## INTRODUCTION

1. In many non-industrialized countries, UNHCR cooperates closely with governments in the process of individual refugee status determination. This report analyses refugee status determination data in 73 asylum countries for which statistics were available as per mid-November covering the period 1 January to 30 September 2004. For 51 of the 73 countries, it is possible to make a quarterly breakdown of the data (see charts and Table 4). Trends in the size of the refugee population, new refugee arrivals, voluntary repatriation and resettlement departures in these 73 asylum countries are analyzed separately in the document *Global Refugee Trends, 1 January – 30 September 2004*.

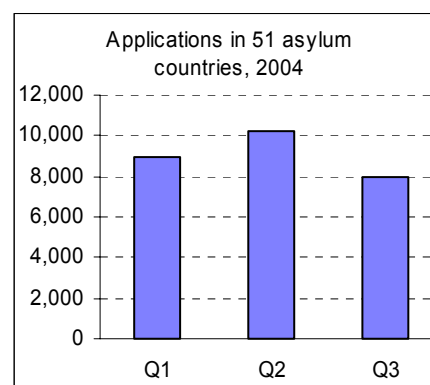

2. The 73 countries covered by this document are mostly developing countries where UNHCR provides operational support to host Governments.<sup>1</sup> The main purpose of this report is to provide updated statistics for *individual* countries and operations.<sup>2</sup>

3. The statistics provided here should be considered as provisional, subject to change. The country codes used in the tables are explained in Annex I. The data provided in the tables generally refer to first instance procedures only. In the few cases where data are available on more than one procedure (first instance and review/appeal, UNHCR and Government), they have been combined.

## Applications

4. From 1 January to 30 September 2004, some 55,600 applications for asylum or refugee status were recorded in the 73 asylum countries covered by this report. During the first nine months of 2004, the number of applications for asylum or refugee status among the 73 countries exceeded 1,000 in 9 countries namely Malaysia, (14,200), Cyprus (6,600), Ecuador (6,600), Egypt (6,400), Pakistan (2,700), Ethiopia (2,600), Guinea (2,100), Cameroon (1,700), and Venezuela (1,600) (see *Table 1*).

5. In the 73 countries, the largest number of refugee status claims was submitted by asylum-seekers from Colombia (8,330), Myanmar (7,350), Sudan (6,880), Indonesia (6,680), Afghanistan (2,340), Bangladesh (2,070), Eritrea (2,010), Côte d'Ivoire (1,740), Liberia (1,530) and Pakistan (1,530).

6. Quarterly trends in 51 asylum countries with available data indicate that the level of applications increased during the second quarter, but fell to the lowest level during the third quarter (see *chart*).

## Decisions

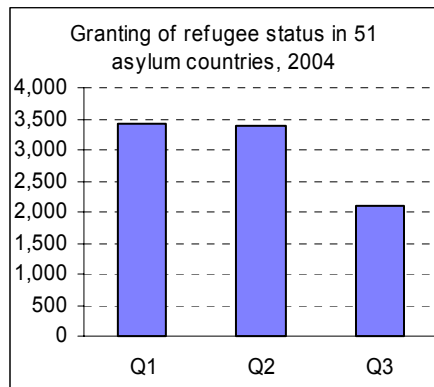

7. Of the 52,400 refugee status determination decisions taken during the first nine months of 2004, 12,100 were positive (recognized), whereas 13,200 applications were rejected on substantive grounds. The refugee recognition rate in these countries for all

<sup>1</sup> For an overview of asylum trends in industrialized countries, see: <http://www.unhcr.org/statistics>, *Asylum Trends*.

<sup>2</sup> For a comprehensive overview of global and regional trends in asylum and refugee status determination, see <http://www.unhcr.org/statistics>, *2003 Global Refugee Trends*.

nationalities combined during the first nine months of 2004 stood at 32 per cent. Some 13,900 claims were closed for other, non-substantive reasons.

8. In 17 of the 73 countries, individual asylum-seekers have been granted complementary forms of protection. During the first nine months of 2004, some 13,200 asylum-seekers were allowed to remain for humanitarian reasons. The large majority of these cases (11,250) were reported by the UNHCR Office in Malaysia. The recognition rate in these 73 countries amounted to 66 per cent when asylum-seekers granted complementary protection are also included (see *Table 1*).

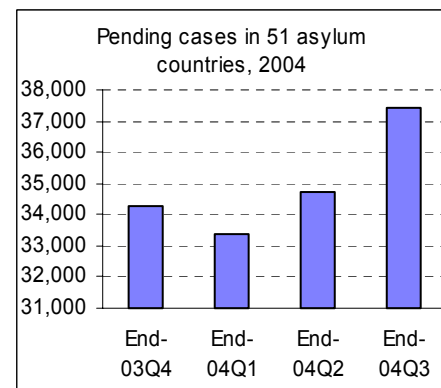

9. In eight of the 73 countries, the number of refugee status determination decisions taken during the first nine months of 2004 was 1,000 or higher, namely in Malaysia (13,700), Pakistan (7,790), Ecuador (6,650), Egypt (5,760), Cyprus (2,650), Ethiopia (2,620), Cameroon (1,320) and Yemen (1,140) (see *Table 1*).

10. In the 51 asylum countries for which quarterly trends are available, the number of decisions during the third quarter were the lowest since 1 January 2004 (see *chart*).

### Pending cases ("backlog")

11. The number of pending cases or backlog is a key indicator for the efficiency in deciding refugee claims as well as for the workload of the office responsible for the adjudication process. If the backlog of undecided cases has increased during the period, the number of new applications lodged exceeded the number of decisions. Conversely, a decrease in the number of pending cases shows that more cases have been decided than submitted. In the 73 countries with available data, the backlog increased by 4 per cent during the first nine months of 2004 to 81,700 cases at the end of September.

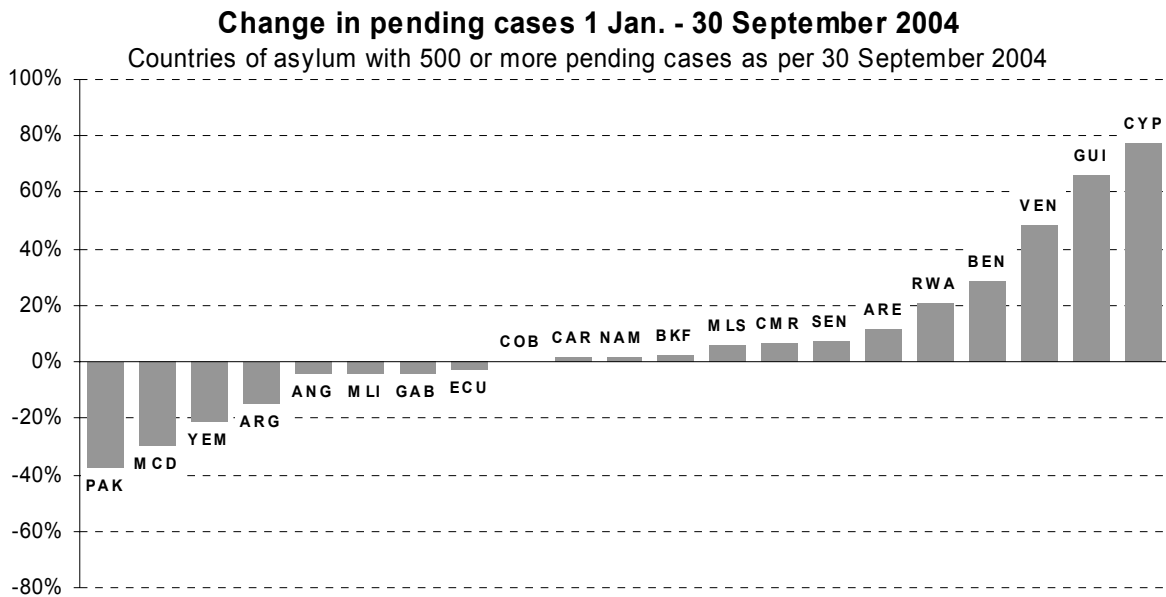

12. In the 51 countries which reported data for each of the three quarters of 2004, the backlog of undecided cases fell during the first quarter of 2004, but increased during the second and third quarter of 2004 (see *chart*).

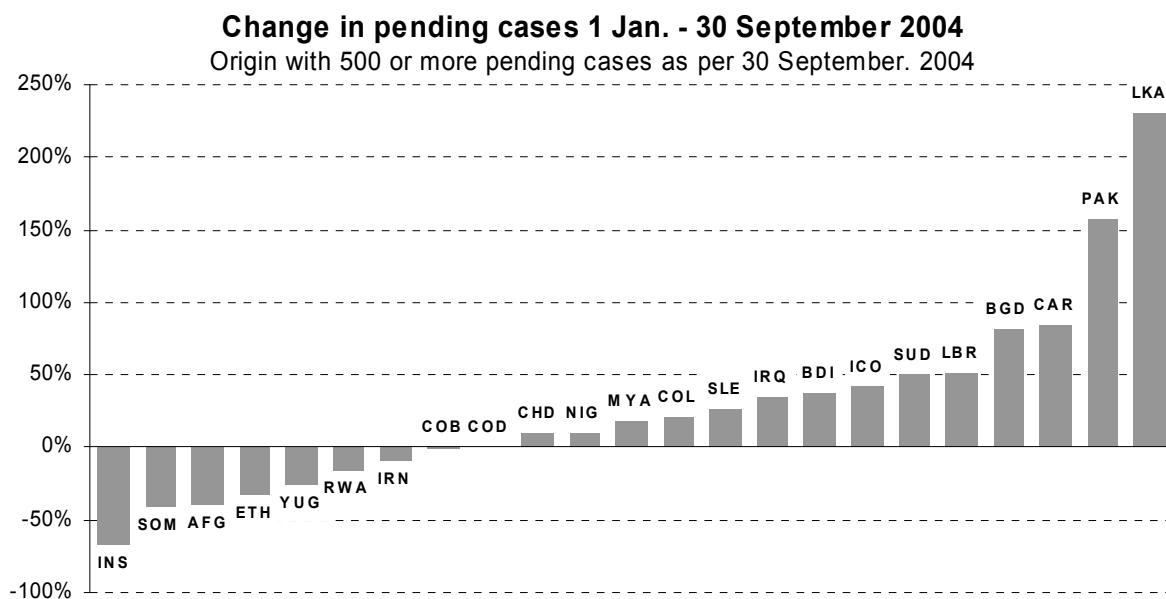

13. By the end of September 2004, there were 16 countries where the number of undecided applications for refugee status exceeded 1,000. The highest number of pending cases was found in Malaysia (9,750), Cyprus (9,030), Pakistan (8,570), Egypt (6,040), Cameroon (6,030), Gabon (4,910), Guinea (4,230), Rwanda (3,640), Central African Republic (3,440), and Venezuela (3,400) (see *Table 1*).

14. At the end of September 2004, there were 21 countries with 500 or more undecided cases. Among these 21 countries, the number of undecided cases during the first nine months of 2004 increased by 10 per cent or more in Cyprus (78%), Guinea (66%), Venezuela (48%), Benin (29%), Rwanda (21%), and Egypt (12%).

15. Significant reductions in the backlog of undecided cases during the first nine months of 2004 were achieved in Pakistan (-37%), FYR Macedonia (-29%), Yemen (-21%) and Argentina (-15%) (see Table 1 and chart).

16. Among the 17 nationalities with more than 1,000 undecided claims at the end of September 2004, the number of pending cases during the period increased for asylum-seekers from Pakistan (158%), Bangladesh (82%), Liberia (52%), Sudan (51%), Côte d'Ivoire (42%), Burundi (37%), Iraq (35%), Sierra Leone (27%), Colombia (21%), Myanmar (18%), and Chad (10%). Nationalities which recorded an important decrease in undecided cases included asylum-seekers from Somalia (-41%), Afghanistan (-40%), Serbia and Montenegro (-25%) and Rwanda (-16%) (see Table 2 and chart).

**Table 3. Applications, refugee status determination and pending cases by origin and country of asylum**

Coverage: 73 asylum countries for which statistics were available at mid-November 2004

Only including nationalities in countries, with 50 or more applications during the first nine months of 2004.

Figures between 1 and 4 have been replaced by an asterisk.

Data are provisional and subject to change.

**TRENDS IN REFUGEE STATUS DETERMINATION, 1 JANUARY – 30 SEPTEMBER 2004**  
**UNHCR GENEVA, DECEMBER 2004**

**Table 4. Applications, refugee status determination and pending cases by country of asylum and quarter**

Coverage: 51 asylum countries for which comparable statistics for each quarter were available at mid-November 2004

Figures between 1 and 4 have been replaced by an asterisk.

Data are provisional and subject to change.

Country of asylum	Decisions during quarter																					Pending end-quarter		
	Applied since 1 Jan.			Recognized			Other (hum.)			Rejected			Otherwise closed			Total
