

# Vulnerability Assessment of Syrian Refugees in Lebanon - VASyR 2020

*'Economic downturn, steep inflation, COVID-19 and the Beirut blast have pushed vulnerable communities in Lebanon - including Syrian refugees - to the brink, with thousands of families sinking further into poverty and vulnerability'*

VASyR 2020 Report, UNHCR, WFP and UNICEF

## 9 out of 10 Syrian refugee households in Lebanon live now in extreme poverty

## Civil and legal documentation has decreased and remains a everyday challenge

Share of Syrian refugees over 15 years old with legal residency in Lebanon

## Refugees faced numerous challenges accessing adequate shelter

33% of refugees live in non-permanent and/or non-residential structures

The costs of these shelters increased by 25% and 22% respectively, compared to 2019

58% of shelters were overcrowded, below humanitarian standards and/or in danger of collapse

## Almost half of the households are now food insecure

Share of moderately and severely food insecure households

## Competition for jobs is the key tension driver with the host communities

Key issues driving host community/refugee tensions

## Access this and other datasets through UNHCR's Microdata Library

The UNHCR Microdata Library (MDL) provides access to microdata containing information about UNHCR persons of concern: refugees, asylum seekers, IDPs, returnees, stateless people, and other persons of concern.
