Working with Partners

- UNHCR works closely with counterparts of the Republic of Indonesia to provide protection, assistance, and to identify solutions for persons under UNHCR's mandate, particularly the Coordinating Ministry for Political, Legal and Security Affairs and its department for Refugees and People Smuggling; the Ministry of Law and Human Rights, including the Directorate-General of Immigration; the Ministry of Foreign Affairs; the Ministry of Social Affairs; the Ministry of Home Affairs and the Ministry of Manpower.
- UNHCR works in a close collaboration with the UNRC and other UN agencies including UNICEF, ILO, WHO, UNFPA, UNWOMEN, UNAIDS, and IOM. UNHCR also engages with international and national NGOs as well as civil society partners, including UNHCR-funded partners and Refugee-led organizations. For example, Church World Service (CWS), Catholic Relief Services (CRS), Jesuit Refugee Service (JRS), the Indonesian Red Cross, Dompot Dhuafa, Human Initiative and the National Human Rights Commission. We assist the Government to ensure that refugees and stateless persons are protected and provided with assistance, such as, inter alia, lifesaving medical assistance, addressing the special needs of the unaccompanied/separated and other children at risk, distribution of monthly cash allowance to the most vulnerable refugees, education assistance, SGBV prevention and response.
- Recently, UNHCR together with the UNRC, UNICEF, IOM and through the advocacy of the UN Country Team, along with other partners and stakeholders such as CWS, CRS, University of Indonesia Hospital (RSUI), Jakarta Provincial Government and Indonesia Chambers of Commerce (KADIN) managed to vaccinate more than 5,000 refugees, using vaccines from different sources including government, donation from the private sectors as well as unused vaccines that were allocated for UN staff and dependents.
- Different UN joint programs are also being effectively implemented in Indonesia, such as the UN Joint Team on AIDS/HIV (UNJTHA), the GAP (Global Action Plan) on Child Wasting, the UN Multi-partner Trust Fund (MPTF) on livelihood and economic inclusion, and the UNICEF – UNHCR Blueprint for Joint Action.
- Several UNHCR's activities are being implemented with the support from the private sector. For example, our PPH/Islamic Philanthropy unit builds partnership with major philanthropy institutions, who are committed to support UNHCR's Cash-Based Intervention program.

Main Activities

Protection

- While Indonesia is not a party to the 1951 Refugee Convention or its 1967 Protocol, it has a long tradition of allowing access to and hosting refugees. Indonesia has enacted a comprehensive national refugee law, signed as a presidential regulation in December 2016, which provides access and temporary protection to refugees in the country until longer-term solutions can be found for them. Under the law, the Government has authorized UNHCR to help protect and find solutions for them.
- The 2016 refugee law includes provisions for the Government to rescue refugees on boats in distress near Indonesia and to help them disembark. These provisions were once again implemented on 25 June and 7 September 2020, when nearly 400 Rohingya refugees were rescued in Lhoksemauwe, Aceh province, then when another group of 81 Rohingya refugees disembarked in East Aceh on 4 June 2021. UNHCR worked together with the authorities, local Refugee Task Force, UN agencies, NGO partners and the local community to provide assistance to the group.

- Indonesia is not a party to the 1954 Convention on the Status of Stateless Persons and 1961 Convention on Reduction of Statelessness. In May 2020, based on a study by UNICEF conducted in 2019, it was reported that over 11 million children in Indonesia were without birth certificate. UNHCR works to advocate for access to universal birth registration for all children of marginalized groups, including refugee children. For the purpose, the office has been working closely with Directorate General of Population and Civil Registry. UNHCR funded partner, University of Diponegoro, is conducting stateless mapping in several border areas in Indonesia to identify who and how many individuals with statelessness issue. This mapping will serve as a baseline for statelessness programming need in 2022.
- Due to the current COVID-19 pandemic, it is critical for UNHCR Indonesia to receive sustained funding to be able to deliver protection and complementary solutions to the persons of concerns as the pandemic continues to pose challenges to the already limited resettlement opportunities.

Community Empowerment and Self-Reliance

- Refugees are not able to exercise their right to work in Indonesia. Recognizing that direct assistance is not sustainable, UNHCR continues to advocate for refugees to be given access to livelihood opportunities and works with partners to create community-empowerment and self-reliance programs that benefit Indonesians and refugees. The programs include vocational trainings and entrepreneurship schemes that promote economic development in Indonesian host communities. In December 2019, at the Global Refugee Forum organised by UNHCR in Geneva the Indonesian Government Delegation pledged support to refugee productivity empowerment activity as part of Indonesia's effort to address the global refugee crisis. A High-Level Meeting will be held every two years, and it will be an opportunity to review progress and challenges. The first High-Level Meeting will take place in December 2021. UNHCR continue to follow up on the pledges made by the Government in the 2019 Global Refugee Forum through different opportunities including during the June 2021 coordination meeting of the National Refugee Task Force.
- Refugee women and men leaders, representing various nationalities, participate in activities implemented by UNHCR and partners, such as assisting vulnerable refugees in accessing services, disseminating information among the refugee community, managing community learning centres, providing skills training and education for children and adolescents, as well as providing interpretation and translation services. In 2020, due to the pandemic-related restrictions, UNHCR started organising Virtual Town Hall meetings with Refugee Representatives (RRs) and the wider refugee communities in Jakarta and other cities where refugees reside. The office continues this good practice in 2021.
- The 1,159 vulnerable refugees from 434 households continued to receive monthly subsistence allowance in October. While the total of those received COVID-19 allowance, in October 2021, is 3,907 individuals (2,460 households). The distribution is made through Post Offices in areas where refugees living independently, including in out-post locations. Previously, from June – December 2020, as many as 5,823 refugees living independently [3,653 male and 2,170 female] had received the first to fifth batch of Covid-19 allowance.

Education

- Indonesia is a signatory to the Convention on the Rights of the Child and provides refugee children access to national schools through the Ministry of Education Circular Letter No. 75253/A.A4/HK/2019 issued on 10 July 2019. UNHCR encourages refugee children to enrol into the national school system. To prepare refugee children for enrolment in national schools, UNHCR is working with partners in Jakarta and the Greater area as well as out-posted locations to teach refugee children Bahasa Indonesia, as well as basic math and literacy, and local customs and culture.

- UNHCR appreciates the Ministry of Education for a circular note to include refugee children in formal education. The circular note, however, does not cover all areas in which refugees live like Bogor, Depok, Bekasi, Bali and Aceh. UNHCR continues to advocate for the expansion of the circular note to overcome some obstacles including the access to formal certification upon completion of studies.
- With our partners, UNHCR works for all refugee children to have access to national schools. In October 2021, some 778 refugee children are enrolled in accredited national schools. UNHCR is conducting verification exercise and will obtain a more accurate number on the enrolment number. Challenges to increase refugee children's enrolment rates include limited knowledge of Bahasa Indonesia, inadequate sources of funding, and reports of limited places in public schools where refugees reside. Around 1,700 school aged children are not yet attending formal schools, but among them some 1,000 children are receiving education through refugee learning centres organised by UNHCR, IOM or centres led by the refugee communities.
- Other educational opportunities include enrolment in online, accredited university courses. UNHCR encourages refugees to complete accredited courses through Coursera for Refugees, a free online learning platform, in addition to non-formal educational, vocational and recreational activities made available for children and youth in children's homes. In Jakarta and the greater area, as well as in the other out-posted locations, refugee communities have several community-based learning centres for refugee children. Through these centres, UNHCR continue to encourage refugee parents to prepare their children with the necessary skills until they are ready to enrol in national schools. As of end of October 2021, some 3,450 refugees are enrolled in online education platforms such as Coursera and EdX and in educational programs organised by the refugee communities.
- During the COVID-19 pandemic, refugee children who previously attended public schools continue their studies with arrangements made by their respective school. Working with partners, online distant-learning are made available for refugee children at UNHCR supported learning centres and some community-based learning centres. Some of the challenges faced by refugee students include the limited ownership of device and internet data that are required for online distant-learning. Language barriers also limit accessing the distant learning programs provided by the government via television.

Health

- Refugees have access to primary medical care through public health facilities, as well as community maternity and childcare, which provides immunizations. UNHCR works with partners in covering life threatening/saving medical situation to the extent of available and mobilised resources.

COVID-19

- The 10 June 2020 Circular Note issued by the Government of Indonesia has ensured access for registered refugees (UNHCR ID card holders) to COVID-19 related services, of which UNHCR appreciates. However, on 21 May 2021, the Ministry of Health issued a Decree No. HK.01.07/MENKES/4718/2021 stating UNHCR ID card is no longer serve as a basis for COVID-19 related services cost coverage, as of 20 April 2021. This regulation in practice has also excluded refugees from government-covered COVID-19 treatment, and UNHCR and its partner have been receiving various request for payment from the hospitals. UNHCR continues to advocate for UNHCR ID cards re-inclusion in the future regulations of Ministry of Health.
- The Ministry of Health issued more detailed instructions on COVID-19 vaccination for refugees through a decree which allows refugees with UNHCR issued identity documents to access the private sector vaccination scheme and also the national COVID-19 vaccination scheme provided that at least 70 per cent of the population in the area where refugees reside have received a first vaccination dose. The updated instructions were officially announced on 27 September 2021. As of October 2021, more

than 5,000 refugees have received vaccination in coordination with the Government and the private sector.

- UNHCR collaborates with partners to provide COVID-19 related information, such as public health services and health-protocols awareness for refugees through social media platforms (Instagram, Facebook, and Twitter). The office also provides COVID-19 Hotline for refugees seeking consultation, then they will be advised to contact CWS Health Hotline for further COVID-19 related inquiries.

Durable Solutions

- While the opportunities provided by countries offering resettlement out of Indonesia are reducing, the most vulnerable refugees are identified for submission for the limited number of resettlement places available. In 2019, 663 refugees departed for resettlement to Australia, Canada, and the United States. This represents 4.8 percent of the total refugee population in the country. Meanwhile in 2020, as of the end of December, only 403 refugees have departed to third countries for resettlement. The outlook for resettlement places is such that it cannot be considered the only viable durable solution for the refugees in Indonesia. Unfortunately, refugees are put in a position that they will not be able to live a meaningful life until they are resettled, although only a small number will be able to benefit from resettlement. From January to October 2021, only as many as 420 refugees departed to resettlement countries. Therefore, it is of utmost importance to find other durable solutions than resettlement and to consider Indonesia as a country of de facto longer stay for refugees.
- After the successful departure of an Afghan refugee to Lithuania on a complementary pathway through education in March 2021, UNHCR together with Roshan Learning Centre are exploring the possibility of a second departure to take place later this year. In May 2021, UNHCR discussed about a potential collaboration with Talent Beyond Borders (TBB) on Labour Mobility Scheme, then in June 2021, after meeting UNHCR Indonesia, TBB has selected Indonesia as one of the countries to take forward the pilot of Labour Mobility Scheme. Following series of bilateral meetings with TBB in July 2021, the pilot project is at the final phase of implementing partner selection. UNHCR discussed with Catholic Relief Services (CRS) on the potential partnership for the project and the CRS confirmed their willingness to take this project forward. The pilot project aims at referring some refugee candidates to Australia under labour mobility scheme by the end of 2021. In August 2021, CRS has been officially selected as an implementing partner for this pilot project. The TBB is organizing series of trainings for CRS staff. Once the capacity building exercise is completed, CRS will start the project's activities in close coordination with TBB and UNHCR.
- UNHCR facilitates voluntary repatriation for refugees who request return, with arrangements made in close cooperation with IOM through its assisted voluntary return program. In 2019, only 1.8% of the total persons of concern (252 people) have returned voluntarily to their countries of origin. Meanwhile as of end of December 2020, 139 refugees have opted for voluntary repatriation (1% of the total persons of concern). So far in 2021, the total number of refugees repatriated voluntarily is 93 individuals.
- UNHCR provides information and guidance to refugees who may have family members abroad and would like to pursue private sponsorship options. In 2019, 57 people (0.4% of total persons of concern) departed abroad on private sponsorships, and in December 2020, the number recorded by UNHCR is 27 people (0.2% of total persons of concern). While as of October 2021, only 24 individual who have been departed on private sponsorships.

Private Sector Partnership (PSP)

- Even though the COVID-19 pandemic has taken its effect in some of the income streams of PSP programme in Indonesia, as of October 2021, PSP Indonesia successfully recorded an income of **IDR2,744,455,158 (USD192,054)**. This income has a 6% increase compared to the previous month and was generated from Digital Fundraising program, Face to Face (F2F) In-House program, and Face to Face Agency

program. By the end October 2021, through regular monthly donation, there are 3,207 donors providing financial support for UNHCR.

- Additionally, the PPH/Islamic Philanthropy program raised **IDR3,336,369,611 (USD233,745)** and managed to establish partnerships with several Islamic philanthropy organizations and foundations to support the UNHCR refugee protection program.

External/ Donor Relations

UNHCR is grateful for the support of the following donors for their funding either directly to the operation or via softly earmarked or unearmarked funds: Australia | Canada | Denmark | European Union | Germany | Ireland | Japan | Netherlands | Norway | Private Donors | Spain | Sweden | Switzerland | United Kingdom | United States of America

In addition, UNHCR thanks the following organizations, private sector partners and other UN Agencies for their support and donation in recent years: Bank Mayapada | Bina Nusantara School | Dato' Tahir | Global Jaya School | Indonesia for Refugees | Metro TV | PT. Eagle Indopharma | PT. Tan Kiang | SPH Lippo Cikarang School | SCTV | Tahir Foundation | Tunas Muda School | Unilever (UK) | Uniqlo | UN Programme on HIV/AIDS | Wanda House of Jewels | IOM | UNICEF | ILO | UNFPA | UNAIDS | Bank Sharia Indonesia | Rumah Zakat Indonesia | BP ZIS Indosat
