

# UNHCR Jordan - Assistance and Protection 2009 Mid-Year Report

Data Analysis Group - 30 July 2009 - Tracking Code: BIS0011

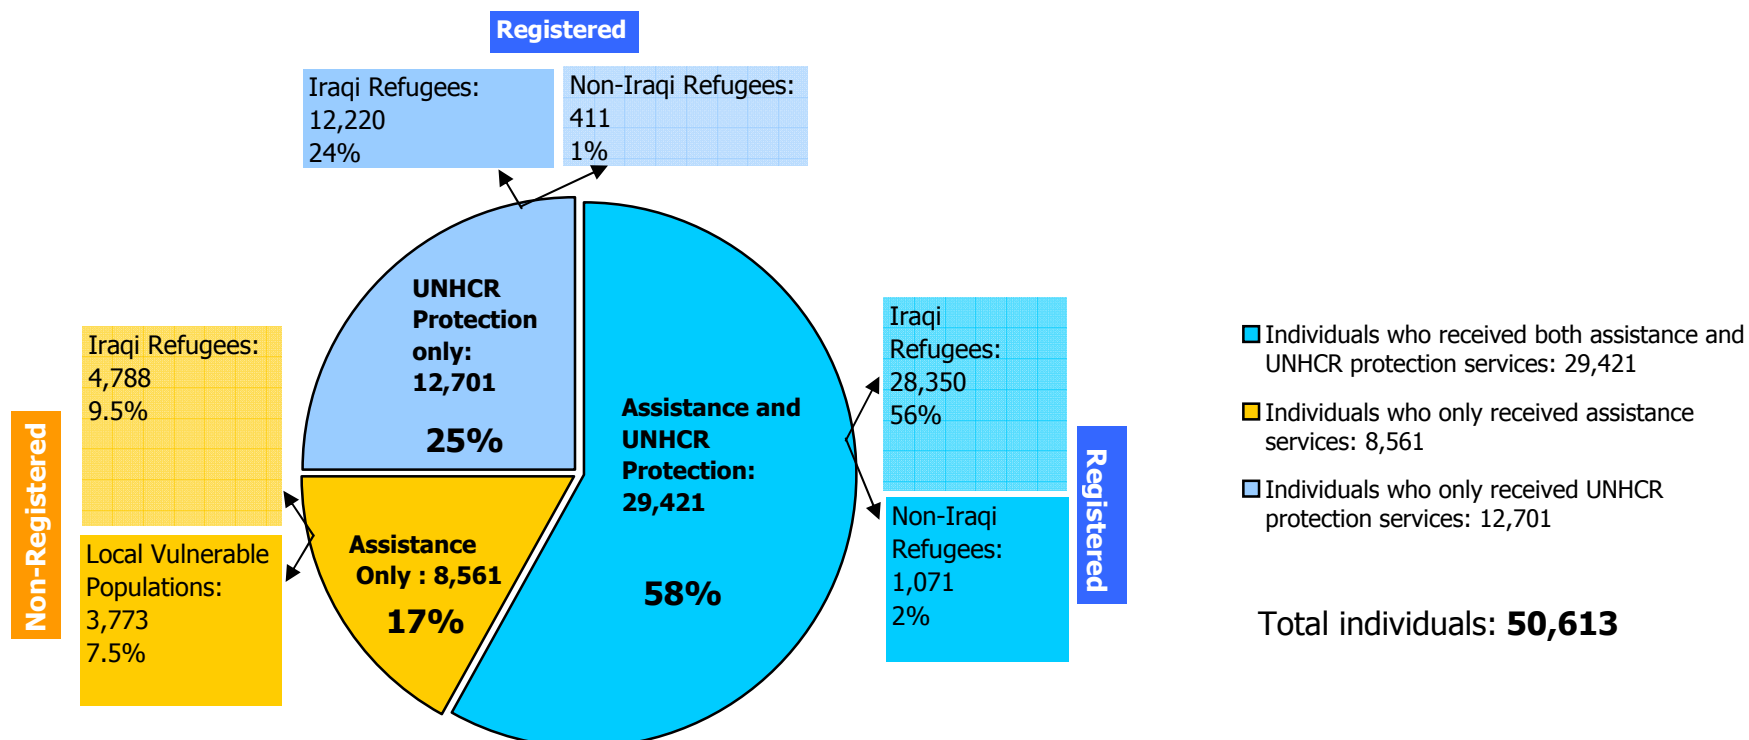

please print in color

- In 2009, UNHCR has focused its activities more on individual, targeted assistance as a means of providing a much-needed safety net. Between January and June 2009, UNHCR and its 23 implementing partners provided services to 50,613 individuals. Targeted assistance was provided to 29,421 individuals who registered with UNHCR and 8,561 individuals who are not registered with UNHCR.
- 12,701 individuals received UNHCR protection services such as registration or resettlement, but did not seek or were not eligible for material assistance.
- As part of the strategy in an urban context to promote coexistence and tolerance, up to 25% of beneficiaries may be locally-affected populations such as vulnerable or poor Jordanians.
- Out of the 50,613 individuals assisted, 3,779 individuals' cases have been closed, mainly due to departure for resettlement.

Individuals who received more than one kind of assistance were only counted once.

## Received Assistance or UNHCR Protection Services: January-June 2009

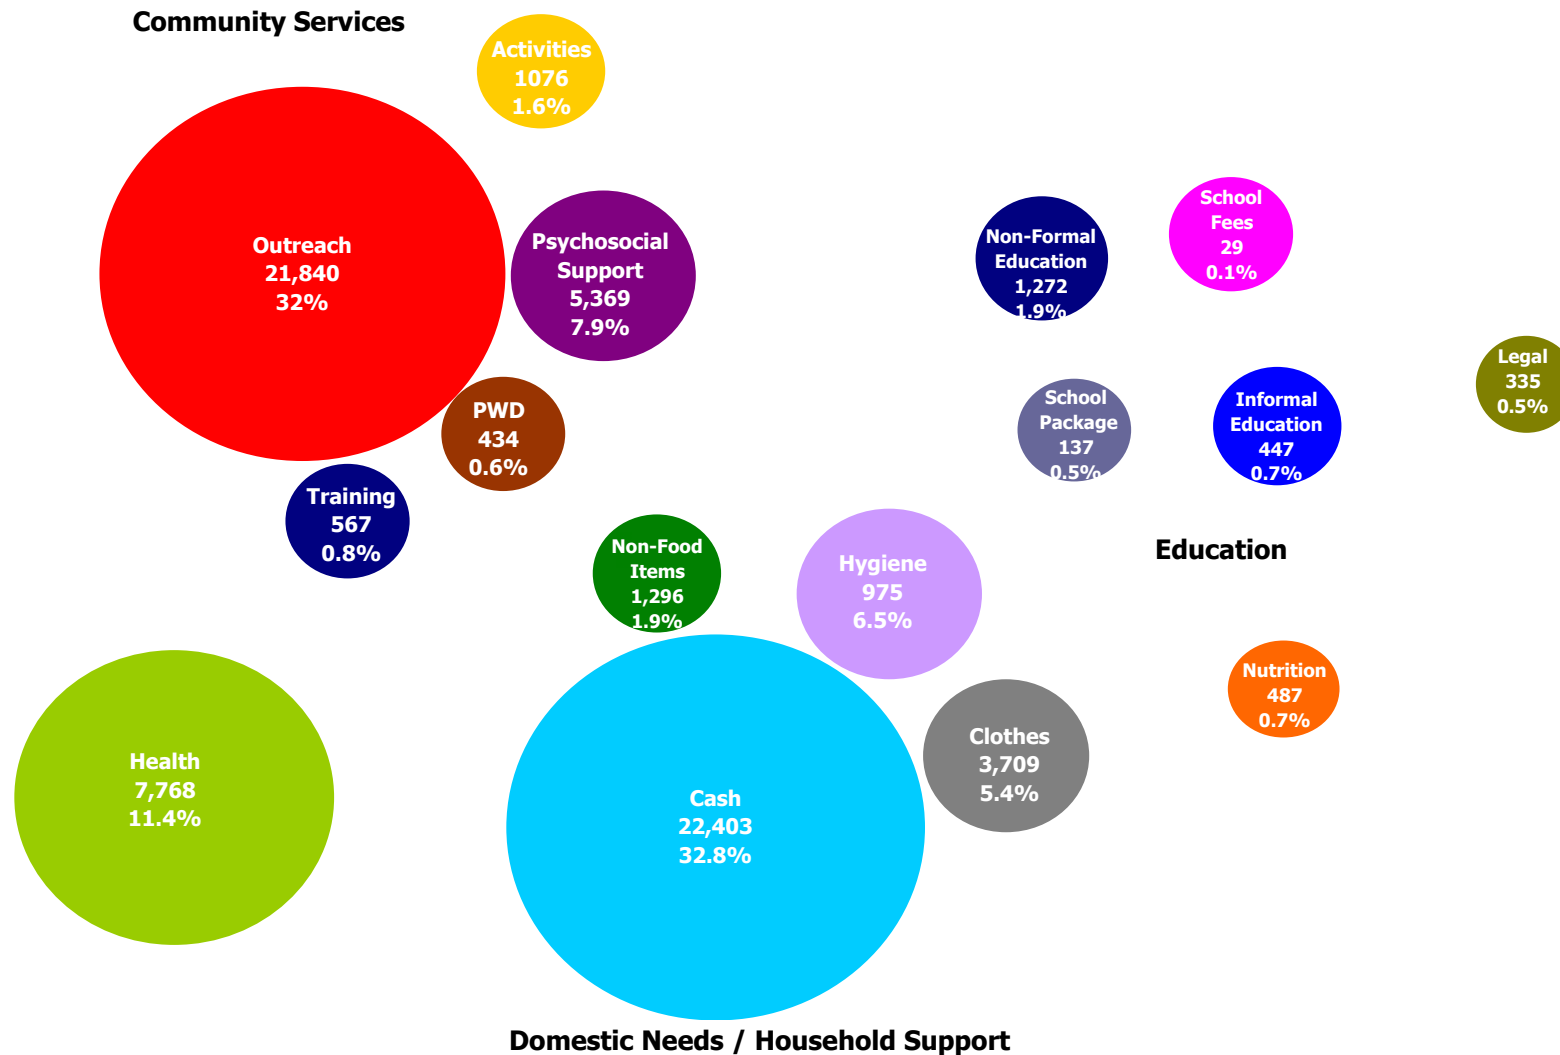

- UNHCR protection services include resettlement, registration, voluntary repatriation and SGBV and legal counseling.
- After receiving assistance from UNHCR's implementing partners, thousands of individuals registered with UNHCR. In 2009, UNHCR conducted a Beneficiary Information System (BIS) database clean-up to delete the non-registered individuals who registered after receiving assistance. In 2008, 39% of the individuals assisted were noted as non-registered beneficiaries, compared to 17% in 2009.
- The country of origin for 393 non-registered individuals is unknown, so were not included in the above chart.

## Assistance Breakdown: January-June 2009

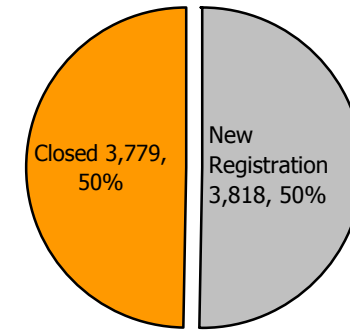

- Cash assistance, outreach and health services were the largest sub-sectors of assistance provided between January and June 2009.
- Outreach volunteers contacted a total of 21,840 individuals, of which 3,671 were non-registered Iraqis. Through these home visits, vulnerable Iraqis can be identified and referred to UNHCR for assistance or protection.
- Cash assistance through ATM cards was provided to 6,789 families / 22,403 individuals, as a much-needed safety net.
- Health services, including 340 referrals, were provided to 7,768 individuals.
- Note: In 2009, Caritas did not enter most of the data on non-Iraqi refugees into BIS, and International Medical Corps did not enter data on mental healthcare.

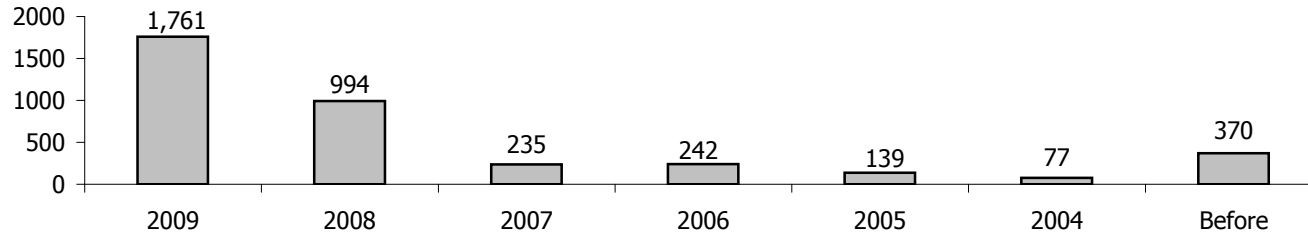

## New Arrivals, New Registration, Resettlement Departures and Voluntary Repatriation: January-June 2009 (as of 30 July 2009)

- A total of 53,498 active individuals are currently registered with UNHCR Jordan (as of 30 July 2009).
- 1,761 individuals arrived in Jordan and registered with UNHCR in 2009. According to recent data from the registration unit, new arrivals register because of resettlement (45%), assistance (39%), protection (14%) and other reasons (2%).
- 3,818 individuals registered with UNHCR between January and June 2009, of which 508 are non-Iraqis.
- There are almost equal amounts of closed cases (individuals) as newly registered individuals; therefore, the size UNHCR's caseload remains stable.
- 2,945 individuals departed for resettlement between January and June 2009, of which 59 are non-Iraqi refugees.
- 151 individuals voluntarily repatriated to Iraq with UNHCR's assistance.

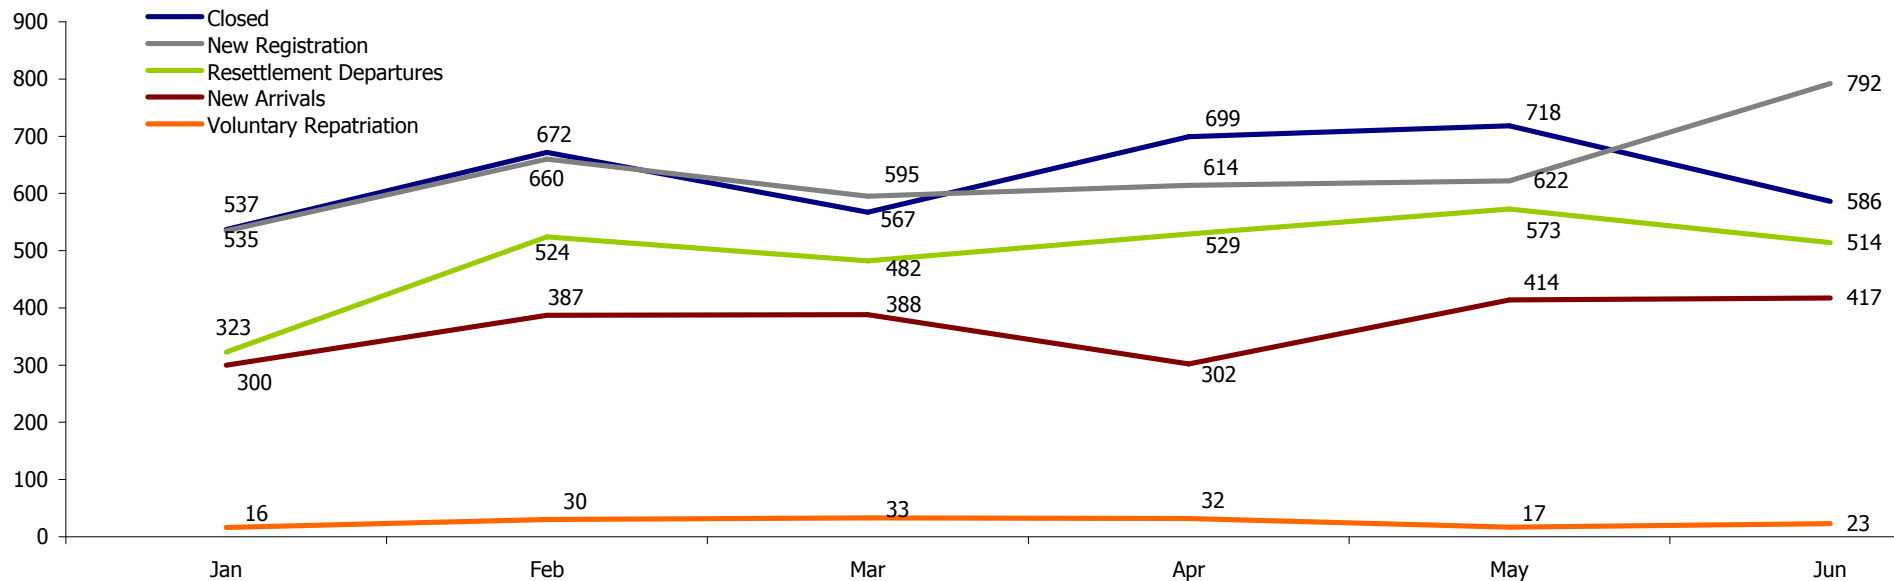

Closed Cases (Individuals) vs. New Registration (Individuals) in 2009

New Registration (3,818 individuals) by Arrival Year

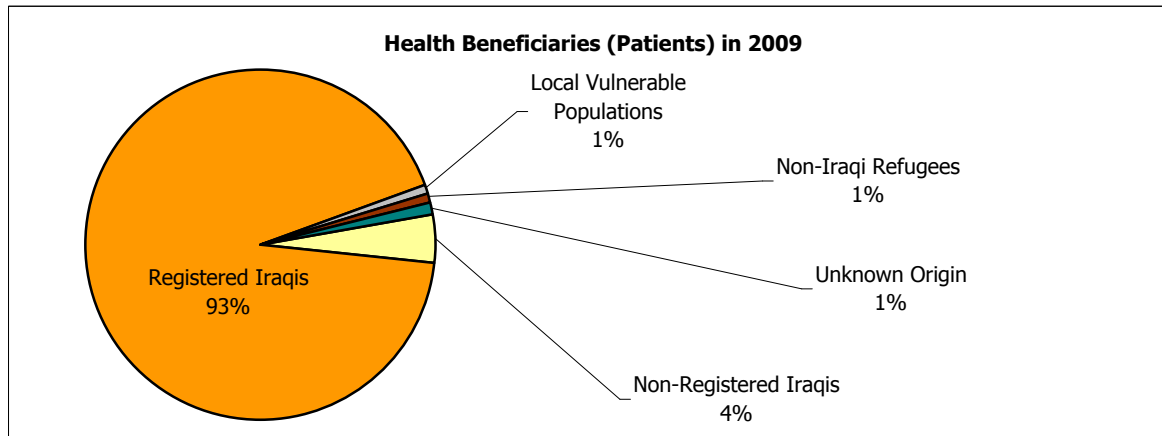

Changes in the Caseload by Month (Individuals)

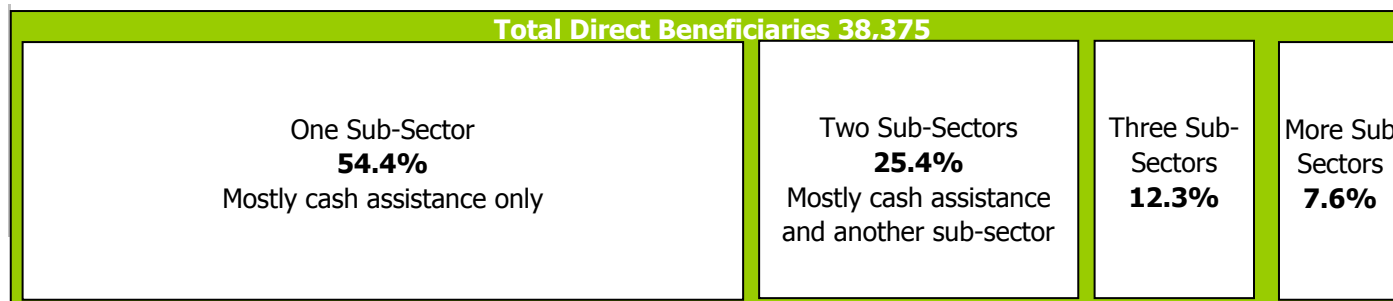

## Health Assistance: January-June 2009

- Out of a total of 53,498 persons currently registered with UNHCR (as of 30 July 2009), 13% of them accessed UNHCR-funded health services in 2009. Iraqis may also receive health services at the public or private health centers.
- 94% of the 2009 health beneficiaries are registered Iraqi and non-Iraqi refugees, 4% are non-registered Iraqis, 1% are local vulnerable populations, and 1% are of unknown origin.
- The health beneficiaries are accessing health services quite often, with an average of 3.8 visits per patient in the first six months of 2009.
- A total of 7,428 unique individuals received health assistance from Caritas and JRC between January and June 2009. Many of these patients visited the clinics multiple times.
- From January to June 2009, Caritas and JRC provided 28,357 instances of assistance.
- The patients in 2009 face socioeconomic vulnerability: 66% of them were on June's cash assistance list.
- 51% of the people who used the health services in 2009 were not accessing these services in 2008. Yet, there are very few people who arrived in 2009 that are using health services. This could suggest that people switched to Caritas and JRC after using other services in the past.
- Note: In 2009, Caritas did not enter most of the data on non-Iraqi refugees into BIS, and International Medical Corps did not enter data on mental healthcare.

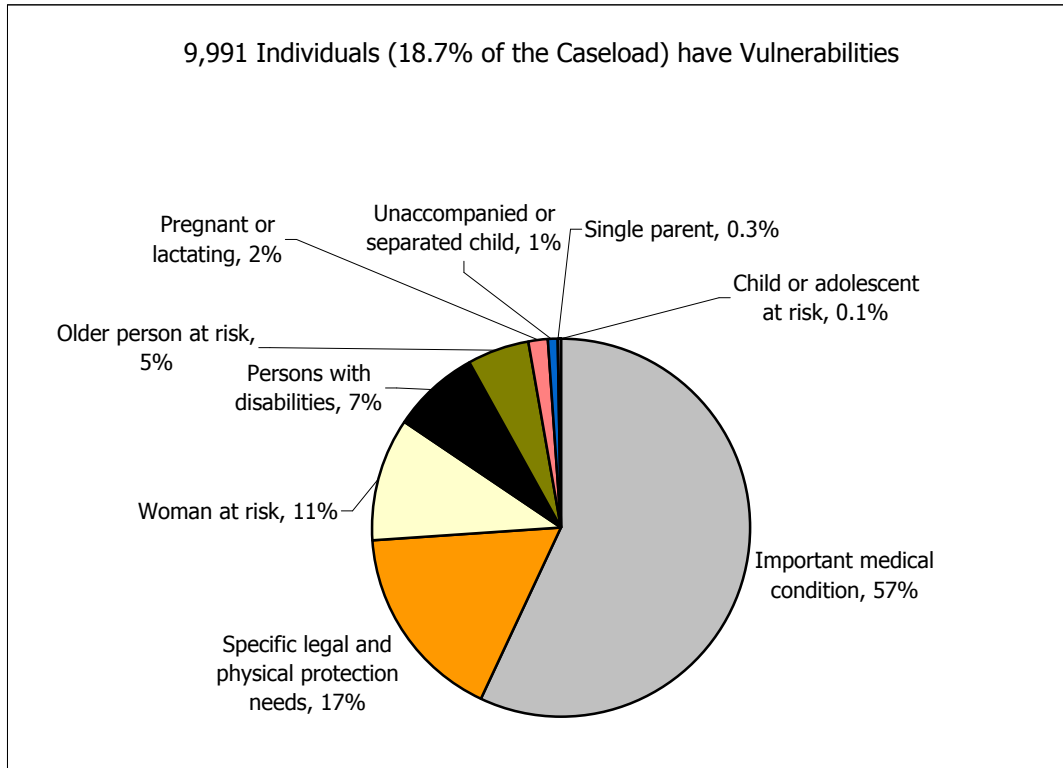

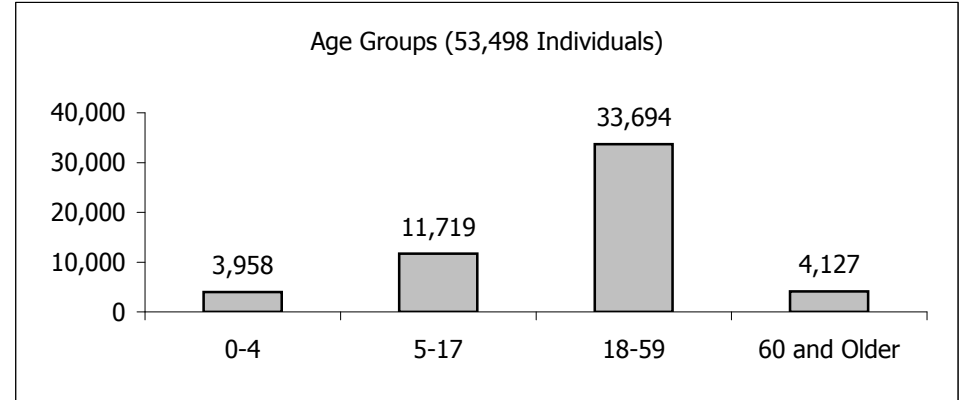

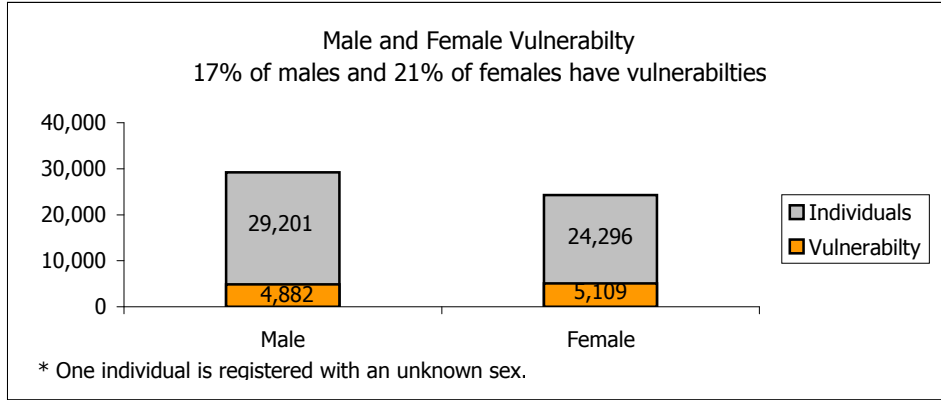

Health Sector	Jan-Jun 2009
Instances of Assistance (number of consultations)	28,357
Unique Direct Beneficiaries (number of unique individual patients)	7,428
Average consultations per patient in six months	3.8

## Individuals Receiving One or More Sub-Sectors of Assistance: January-June 2009

- Similar to 2008, the majority of the beneficiaries are receiving only one sector of assistance. This may indicate that the provision of cash assistance helps cover basic necessities.
