2. UNHCR budget and expenditure in 2017	20

I. Background

1. General Assembly Resolution 71/1 (New York Declaration for Refugees and Migrants) called on the High Commissioner to include a proposed global compact on refugees in his annual report to the General Assembly in 2018, for consideration by the Assembly at its seventy-third session, in conjunction with the annual resolution on the Office of the United Nations High Commissioner for Refugees.¹ Accordingly, this year's report is provided in two parts: Part I covers the activities of the Office for the period from July 2017 through June 2018, while part II contains the proposed global compact on refugees.

II. Introduction

2. In 2017, the world witnessed a succession of humanitarian crises, as new and ongoing conflicts continued to cause massive displacement. By the end of the year, 68.5 million² people had been forced from their homes due to conflict, persecution and generalized violence, including 25.4 million refugees³ and 40 million internally displaced persons (IDPs). Millions of people around the world were also stateless.

3. In the second half of 2017, a new exodus from Myanmar to Bangladesh turned into the fastest-growing refugee emergency in the world. In September 2017 alone, more than half a million stateless Rohingya refugees fled to Bangladesh and by the end of June 2018, the number of new arrivals exceeded 700,000. Meanwhile, ongoing crises in Burundi, the Central African Republic, the Democratic Republic of the Congo, Nigeria and South Sudan caused wide-spread displacement in Africa. The situation was particularly acute in South Sudan, where more than a third of the country's 12 million citizens were displaced internally and across borders. In the Middle East, the Syria conflict entered its eighth year, and the situation in Yemen deteriorated significantly, becoming the world's most acute humanitarian crisis. The exodus of some 1.5 million Venezuelans created significant challenges for neighbouring countries, as well as States further afield. The past year was also marked by continued, albeit decreased, mixed movements across the Mediterranean Sea to Europe.

4. Some 667,400 refugees were able to return home in 2017, up from 552,200 the previous year. UNHCR was able to submit 75,200 refugees for resettlement, but saw a reduction in the number of places made available.

5. Low and middle-income countries continued to shoulder the largest burden and responsibility, hosting some 85 per cent of refugees globally. Sixty-three per cent of the refugees under UNHCR's responsibility lived in just 10 countries. Despite the significant social and economic challenges faced by major host countries, their governments and communities continued to demonstrate solidarity and generosity, upholding the principles of international refugee protection.

6. Against this background, there was an urgent need for more equitable burden- and responsibility sharing. The comprehensive refugee response framework (CRRF), contained in annex I of the New York Declaration, presented an opportunity to chart a new course forward in this respect. Through the initial application of the CRRF and the development of the global compact on refugees, the international community has sought to reinforce international cooperation to facilitate more equitable, predictable and sustained support for refugees and host countries, and to strengthen solutions, including through assistance to countries of origin.

¹ See [A/RES/71/1](#), annex I, paras. 18 and 19.

² Table 1 presents the populations of concern to UNHCR at the end of 2017.

³ This includes 19.9 million refugees under the mandate of UNHCR and some 5.4 million refugees under the mandate of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA).

III. From the New York Declaration to the global compact on refugees

A. Application of the comprehensive refugee response framework

7. The imperative of the New York Declaration, which tasked UNHCR with developing and initiating the CRRF in a range of contexts, including in protracted situations, was firmly rooted in the work of the Office over the past year. Based on the principles of international cooperation and burden- and responsibility-sharing, the CRRF is designed to strengthen protection and assistance for refugees, to support the host States and communities involved and to facilitate access to solutions. The CRRF represents a new way of working, providing a more inclusive and effective response model and emphasizing strong humanitarian and development cooperation.

8. As of June 2018, with support from UNHCR, the CRRF was being applied in 14 countries: Belize, Chad, Costa Rica, Djibouti, Ethiopia, Guatemala, Honduras, Kenya, Mexico, Panama, Rwanda, Somalia, Uganda and Zambia. Building on their national responses, Djibouti, Ethiopia, Kenya, Somalia and Uganda were also applying the CRRF in the regional context through the Nairobi Declaration and Action Plan on Durable Solutions for Somali Refugees and Reintegration of Returnees in Somalia, supported by the Intergovernmental Authority on Development (IGAD). Similarly, Belize, Costa Rica, Guatemala, Honduras, Mexico and Panama were applying comprehensive responses, building on existing regional and subregional cooperation mechanisms, rooted in the San José Action Statement and the Brazil Declaration and Plan of Action. In October 2017, these States adopted the San Pedro Sula Declaration, committing to develop and implement a comprehensive regional protection and solutions framework (known by its Spanish acronym MIRPS).

9. A number of lessons have emerged from the application of the CRRF. Chief among them are the importance of strong government ownership and leadership in driving the response, as well as the importance of a multi-stakeholder approach which expands the base of cooperation, including with development actors, financial institutions and private sector partners, as well as refugees and host communities. The application of the CRRF has also demonstrated the value of policies that promote social and economic inclusion of refugees through access to education, skills training and livelihood opportunities — with support from the international community.⁴ The CRRF, while universal in nature, has proven itself relevant and adaptable to a range of contexts, and its practical application has provided the basis for the development of the global compact on refugees.

B. Process leading to the global compact on refugees

10. In addition to lessons learned from the application of the CRRF, the process leading to the development of the global compact on refugees drew on innovative approaches (such as the Regional Refugee and Resilience Plan (3RP) for the Syria situation) and progressive policies in countries around the world. It involved, importantly, extensive engagement and formal consultation with States and other relevant stakeholders. In the second half of 2017, five thematic discussions were organized involving States, regional organizations, international organizations, non-governmental organizations (NGOs), the academic community and other experts, private sector partners, UNHCR's Global Youth Advisory Council and other refugees and host community representatives. These discussions highlighted good practices and resulted in concrete suggestions for the global refugee compact.

11. The High Commissioner's Dialogue on Protection Challenges in December 2017 served as a stocktaking exercise and helped inform the "zero draft" of the global refugee compact, issued in January 2018.

⁴ See <http://www.globalcrrf.org/>.

12. Six formal consultations were convened between February and July 2018 to facilitate the development of the text of the proposed global refugee compact, through an iterative process. Revisions were carefully made, balancing the various views of delegations and building on areas of convergence. Also taken into consideration were nearly 500 written submissions received from various stakeholders, including refugees. Special efforts were made throughout the process to ensure complementarity with the global compact for safe, orderly and regular migration in relation to cross-cutting issues.

13. This rich process resulted in a global refugee compact that is practical and implementable. It places emphasis on four key elements: i) easing pressure on host countries and communities; ii) enhancing refugee self-reliance; iii) expanding access to third country solutions; and iv) supporting conditions for voluntary return in safety and dignity. The framework for international cooperation established by the global refugee compact will allow host countries and communities to receive support that is timely, predictable and sustainable. It will maximize development cooperation alongside, and as a complement to, humanitarian assistance, and it will ensure that solutions are front and centre of all responses. Through its programme of action in particular, the global refugee compact will seek to mobilize political will and broaden the base of support needed to address today's refugee crises.

IV. Refugees

14. In 2017, the global refugee population under UNHCR's mandate grew to 19.9 million, an increase of 2.9 million from the previous year. Turkey continued to be the country hosting the largest number of refugees (3.5 million), followed by Pakistan (1.4 million), Uganda (1.4 million), Lebanon (998,900) and the Islamic Republic of Iran (979,400). While Turkey and Uganda faced significant increases (21 per cent and 44 per cent respectively) in 2017, the number of refugees in Bangladesh rose from 276,200 to 932,200 at year end.

A. Protection

15. Most countries around the world provided access to asylum and protection to those fleeing persecution, conflict and human rights violations, upholding the principle of non-refoulement. However, access to territory and protection in some countries was affected by physical, legal and administrative barriers. The use of prolonged, arbitrary and even indefinite detention was also a concern. In some countries, including Libya and Yemen, there were reports of abuse inside detention facilities. Asylum-seekers reported being subject to physical and sexual abuse, extortion and humiliation, with others being denied food and threatened with removal or deportation. In line with its global strategy to end detention, UNHCR continued to advocate alternatives to this practice, particularly for children.

16. UNHCR worked with States and regional organizations to strengthen legal frameworks for refugee protection. It promoted accession to the 1951 Convention and other relevant instruments, and helped guide their interpretation and application, including through engagement in national and regional legislative and judicial processes. UNHCR also helped States develop national legislation related to refugee status determination (RSD) in close to 80 countries around the world. Consistent with the CRRF, UNHCR sought approaches that supported asylum systems more holistically, including through capacity assessment and development. While carrying out RSD in a number of countries, UNHCR encouraged States to assume, where possible, greater responsibility for this process. During the reporting period, Cameroon, Morocco and Turkey progressively assumed national ownership for asylum procedures, and there were significant steps taken in Indonesia and Thailand. UNHCR supported State institutions responsible for RSD, including through quality assurance initiatives in Latin America and Europe. It also assisted several countries in addressing RSD backlogs, ensuring fairness while enhancing efficiency.

17. UNHCR engaged with the European Union and its Member States on reforms to the Common European Asylum System, including by submitting a series of recommendations which set out ways for the system to better assess protection needs and foster greater responsibility-sharing among Member States. In September 2017, UNHCR signed a memorandum of understanding (MOU) with the League of Arab States aimed at establishing a more effective response to the needs of refugees in the Arab region. In November 2017, UNHCR also signed an MOU with the Southern Common Market (MERCOSUR) to promote international refugee law and adherence to international protection instruments.

18. Mixed movements of refugees and migrants, by land and by sea, presented serious challenges. Through its 10-Point Plan in Action, UNHCR enhanced operational cooperation with partners and promoted good practices to help States respond more effectively. This included supporting arrangements to identify, screen and refer new arrivals to appropriate services. In the Asia and Pacific region, the Office continued to urge the Government of Australia to end its policy of offshore processing of refugees who arrive by sea without a valid visa. In Europe, UNHCR developed a border protection monitoring information system to ensure systematic collection and harmonization of information on protection concerns faced by asylum-seekers. The system will support evidence-based protection interventions, cross-border coordination and advocacy. The Office also developed a set of practical recommendations for States to prevent and respond to trafficking in persons and related abuses along the routes to Libya and Europe. Furthermore, UNHCR carried out an awareness-raising campaign to highlight the dangers of crossing the Red Sea and Gulf of Aden to Yemen.

19. In July 2017, UNHCR pursued a strategy to address the situation along the central Mediterranean route, including the establishment of an evacuation transit arrangement out of Libya for vulnerable individuals. With support from the European Union, and in cooperation with the International Organization for Migration (IOM), an evacuation transit facility was established in Niger, from which durable solutions in third countries could be pursued. As of July 2018, UNHCR evacuated over 1,500 people to Niger, as well as smaller numbers to Italy and Romania. Given the continued loss of lives, measures to enhance life-saving search and rescue operations in the Mediterranean Sea are urgently needed. In June 2018, UNHCR and IOM prepared a proposal on regional arrangements for ensuring predictable and safe disembarkation of those rescued at sea, in line with international law, in conditions that uphold their rights, including with respect to the principle of non-refoulement, and with a view to preventing serious harm.

20. In March 2018, UNHCR issued an updated version of its age, gender and diversity (AGD) policy, setting out an inclusive approach to programming with a view to enabling all persons of concern to access their rights on an equal basis and to participate meaningfully in decision-making. In Malaysia, for example, UNHCR supported refugee women in assuming active roles in their communities, resulting in 130 refugee women taking on community leadership positions and 6 heading community-based organizations. In the Democratic Republic of the Congo, UNHCR organized literacy courses for women and girls, resulting in better participation in decision-making structures.

21. Measures to counter SGBV included the hiring of refugee men and women to patrol camps and reception centres and assist with maintaining law and order, as well as the installation of improved fencing, lighting, and separate sanitation and sleeping facilities for men and women. Safe spaces for women and children at risk were established in many regions. In the Americas, the Regional Safe Spaces Network was expanded to two new countries, Colombia and Venezuela (Bolivarian Republic of). In Italy, UNHCR helped develop procedures to assist refugees who experienced torture before arrival and adopted a strategy to address SGBV. In Greece, UNHCR and the Government signed an MOU to support refugee women and children at risk. UNHCR issued a report highlighting promising initiatives to address gender-related protection needs and to enhance gender equality for Syrian refugees.

22. In 2017, about half of the refugee population were children. Globally, there were also some 138,700 unaccompanied and separated child refugees and asylum-seekers, as reported by 63 operations. UNHCR worked with partners to uphold the best interests of the

child, including through alternative care arrangements for those separated from their families, guardianship arrangements, best interests determination procedures, psychosocial support and, where available, the inclusion of refugee children in national child protection systems. In Europe, UNHCR, the United Nations Children's Fund (UNICEF), and the International Rescue Committee established a consultative process to support States in strengthening protection responses for unaccompanied and separated children. UNHCR, the International Labour Organization (ILO) and UNICEF developed a regional framework to address child labour in the Syria context. UNHCR supported efforts by States and partners to reunite family members and advocated flexible approaches. Argentina, Brazil and Panama established new national protocols to ensure children have access to asylum processes and to promote family reunification and alternatives to detention. El Salvador and Honduras introduced best interest procedures to enhance identification and response capacity for children at risk in the north of Central America. Access to birth registration and civil documentation was identified as a critical child protection concern in the Syria situation.

23. UNHCR worked to expand access to primary education, enrolling more than 355,000 refugee children through the Educate a Child programme. In Pakistan, the enrolment of women in teacher training courses increased, with the expectation that more female teachers would improve girls' enrolment and reduce drop-out rates. In line with the CRRF, UNHCR also advocated the inclusion of refugee children and youth in national educational systems. Together with the Global Partnership for Education, UNHCR supported 22 country programmes to develop and implement national education policies and practices that ensure refugee students could access quality education through national systems.

24. In December 2017, IGAD Member States adopted the Djibouti Declaration on Refugees, committing to the inclusion of refugees in national education plans by 2020, consistent with the CRRF. In April 2018, the Nairobi Declaration and Call for Action on Education brought additional commitments from States to make education systems more inclusive of refugees. UNHCR also welcomed efforts by Belize, Djibouti, Ethiopia, the Islamic Republic of Iran, Panama and Turkey to enhance access, in some cases by removing barriers such as tuition fees and other requirements. In Uganda, the recently adopted national Education Response Plan aims to ensure that refugee and host community children and adolescents have access to education. The Education Cannot Wait fund allocated \$3.3 million to support the Government in these efforts. Connected learning, combining digital platforms with traditional classroom teaching, provided higher education for 3,500 refugees in Afghanistan, Chad, Iraq, Jordan, Kenya, Malawi, Rwanda, Sri Lanka, Sudan and Thailand, while 6,700 scholarships from the Albert Einstein German Academic Refugee Initiative (DAFI) supported higher education for refugees in 50 countries.

25. UNHCR strengthened its engagement with refugee youth through the establishment of a Global Youth Advisory Council and a Youth Initiative Fund, which supported over 40 youth-led protection projects around the world. Recognizing that people with disabilities are at increased risk of violence, exploitation and abuse, and that their exclusion from essential services, education and livelihoods is often worsened in displacement, UNHCR helped ensure their access to vital services and inclusion in comprehensive refugee responses.

B. Emergency situations

26. Ensuring an effective and timely emergency response remained a priority for UNHCR. In 2017, the Office released a revised policy on emergency preparedness and response, which reflects recent changes in the operational environment and takes into account new developments, including the CRRF. The Office responded to numerous new and existing emergencies, while ensuring capability to respond to an emergency within 72 hours through the deployment of personnel and the delivery of emergency relief items.

27. With 6.3 million refugees, sub-Saharan Africa hosted almost one third of the world's refugee population. In 2017, the refugee population in the region increased by 1.1 million

(22 per cent), mainly due to the crisis in South Sudan, from where more than 1 million people fled (mostly to Uganda, but also to Ethiopia and Sudan). The situation in the Democratic Republic of the Congo deteriorated due to conflict in South Kivu and the Kasai region. In 2017, some 100,000 Congolese fled to neighbouring countries, while the first half of 2018 saw nearly the same numbers crossing the borders, bringing the total number of refugees in the region originating from the Democratic Republic of the Congo to over 740,000. In the Central African Republic, violent clashes and intercommunal tensions increased sharply, with conflict spreading to previously unaffected parts of the country. The refugee population increased by 11 per cent, from 490,000 to 545,000, with most new arrivals finding refuge in Cameroon and the Democratic Republic of the Congo. Burundian refugees continued to arrive in neighbouring countries, although at lower levels than in the previous year. By the end of June 2018, 430,000 Burundians had sought refuge in the Democratic Republic of the Congo, Rwanda, Uganda and the United Republic of Tanzania.

28. Compounding these emergencies in sub-Saharan Africa were challenges related to drought and food insecurity, which threatened the wellbeing of refugees and their host communities across the continent. Meanwhile, constraints related to access and underfunding further exacerbated the pressure on humanitarian organizations to respond to emergencies and deliver assistance in a timely manner.

29. In the Americas, the deteriorating socioeconomic situation in Venezuela (Bolivarian Republic of) and other factors triggered the movement of Venezuelans across borders, bringing the number of arrivals in neighbouring countries since 2014 to over 1.5 million. UNHCR worked with governments, IOM and other partners to support the Venezuelans and host communities. In the north of Central America, high levels of violence perpetrated by gangs and organized criminal groups resulted in increasing numbers of people on the move. In 2017, some 105,000 new asylum applications by nationals from the north of Central America were registered in the region, 38 per cent higher than the previous year. Increases were also observed in the United States of America, where the Office was in discussion with government officials on protection-sensitive responses. UNHCR and partners helped provide accommodation for those at risk in temporary safe locations. While the implementation of the peace agreement in Colombia was in its first year, parts of the country continued to be affected by the presence of armed groups, generating displacement.

30. In the Asia and Pacific region, the outflow of stateless Rohingya refugees from Myanmar represented the largest and most sudden the region had experienced in decades. The crisis, which began in August 2017, saw half a million people flee across the border in little more than one month. The Government of Bangladesh maintained open borders and showed tremendous generosity in hosting the new arrivals. In response to the emergency, UNHCR rapidly expanded its operational capacity, mobilizing airlifts of humanitarian aid and increasing its presence in Bangladesh, in support of the Government. Providing shelter proved particularly challenging given the high population density and difficult topographical conditions. In June 2018, the monsoon season in Bangladesh left refugees vulnerable to landslides, flooding and disease. The Bangladeshi authorities, UNHCR, IOM and other partners worked to mitigate the risks and responded with emergency interventions, including search and rescue operations, relocations and the distribution of shelter kits and additional aid.

31. Overall, the number of refugees and migrants reaching Europe by land and by sea was significantly lower than in previous years. However, the latter half of 2017 saw an increase in arrivals along the western and eastern Mediterranean route, affecting Greece and Spain, reaching over 39,000. UNHCR continued to provide targeted assistance, including through cash grants, to those arriving and to support governments in strengthening reception and registration. Four years after the conflict in eastern Ukraine began, the protracted humanitarian crisis persisted, with increased security incidents recorded at the contact line in 2017. By the end of June 2018, over 497,000 Ukrainians had sought asylum in other countries, mainly in the Russian Federation, but also in Israel and the European Union.

32. In the Middle East and North Africa, the number of registered Syrian refugees reached 5.5 million, an increase of nearly 500,000 from the previous year. Turkey hosted the largest number (3.4 million), followed by Lebanon (992,100), Jordan (655,000), Iraq

(247,000) and Egypt (126,000). Yemen remained a transit and destination route, despite the ongoing conflict, with over 100,000 refugees and asylum-seekers arriving from the Horn of Africa in the first half of 2018. In North Africa, the situation remained highly complex, involving new and protracted refugee situations, as well as mixed movements. Due to their unrecognized legal status, persons of concern both in camps and urban areas often faced difficulties in accessing employment and essential services, leaving many dependent on humanitarian assistance. In Libya, the volatile security and political situation continued to impact the population and aggravate the protection environment for refugees and asylum-seekers. Despite ongoing restrictions to humanitarian access, UNHCR was able to secure the release from detention of some 1,500 refugees and asylum-seekers.

33. Pressing humanitarian needs compelled UNHCR to deploy personnel not just close to, but often within active combat zones. During the reporting period, UNHCR faced significant security challenges, especially in operations in Afghanistan, Iraq, Somalia, South Sudan, the Syrian Arab Republic and Yemen. In 2017, there were over 400 security incidents involving UNHCR staff, assets and facilities. Four staff members were seriously injured in security incidents and one was abducted but later released. UNHCR continued to enhance safety and security for its staff and affiliate workforce, in collaboration with the United Nations Department of Safety and Security.

C. Supporting refugees and host countries

34. The costs associated with hosting refugees, notably in protracted situations, are borne disproportionately by some of the world's poorest countries. Measures to address this and commitments to assisting both refugees and local populations emerged in humanitarian, development and private sector programmes and investments. These efforts were reinforced by the CRRF. Within UNHCR, the establishment of a new Division of Resilience and Solutions will add impetus to the organization's work in this area.

35. In December 2017, UNHCR was invited by the United Nations General Assembly to coordinate an effort to measure the impact of hosting refugees and to consider how international burden- and responsibility-sharing for refugee protection and assistance could be strengthened.⁵ Subsequently, UNHCR prepared a position paper and convened two consultative meetings with interested States in February and May 2018, during which it presented a proposal on how to take the subject forward. This was informed by preliminary exchanges with the World Bank and the Organisation for Economic Cooperation and Development (OECD) on how appropriate data could be collected and analysed.

36. The draft outline for the approach was shared during a briefing to States at the seventy-second meeting of the Standing Committee in June 2018. A proposal was made to establish an expert group composed of participants from a range of both donor and refugee host countries, with the aim of agreeing on methodologies for measuring impact and subsequently generating data on donor and host country contributions. The results would provide empirical evidence and a metric that maps current burden-sharing equity, with a view to issuing a first report ahead of the first global refugee forum in 2019.

37. The growing partnership between UNHCR and the World Bank focused on support to government-led responses to displacement and a commitment to supporting refugees and host communities. The two key financing instruments, the International Development Association (IDA) sub-window for refugees and host communities, and the Global Concessional Financing Facility (GCFF) for least developed and middle-income economies, helped strengthen cooperation to address the socioeconomic and development needs of refugees and local communities. From 16 countries under consideration for IDA financing, Bangladesh, Cameroon, Chad, the Congo, Djibouti, Ethiopia, Niger, Pakistan and Uganda were confirmed following joint World Bank-UNHCR field missions. The first set of programmes approved under the IDA-18 sub-window will begin implementation in Bangladesh, Cameroon, Ethiopia and Uganda. In its first year, the GCFF approved \$200 million in funding and mobilized \$1 billion in concessional financing for seven

⁵ See [A/72/150](#).

development projects across a range of key sectors in Jordan and Lebanon, including job-creation, business competitiveness, water infrastructure, health and transportation.

38. Collaboration was broadened with the International Finance Corporation, building on the study it conducted in Kenya, “Kakuma as a marketplace”, which aims to provide the private sector with data that will allow informed decision-making on providing goods, services and employment in refugee host areas. Similar studies are planned in several other African host countries.

39. Bilateral cooperation agencies supported programmes targeting both refugees and host communities. Their contributions were critical to supporting operational frameworks such as the 3RP for the Syria refugee situation, which combines both humanitarian and development components, and programme interventions such as ReHOPE in Uganda and the integrated settlement in Kalobeyi in Kenya. UNHCR collaborated with the Swedish International Development Cooperation Agency (SIDA), the Grameen-Crédit Agricole Foundation, the United Nations Capital Development Fund and Financial Sector Deepening Africa (FSDA) to provide refugees and host communities with access to financial services through a lender’s guarantee facility and loans. In total, through a range of programmes, the World Bank and bilateral development donors have mobilized more than \$3 billion in support of the objectives of the CRRF over a multi-year period.

40. UNHCR and the United Nations Development Programme (UNDP) adopted a joint work programme in October 2017, committing to closer cooperation in a range of areas to address displacement and support local communities. Joint projects were implemented in several CRRF roll-out countries. In Ethiopia, a community project implemented by the Government, UNHCR, UNDP, UNICEF, the United Nations Entity for Gender Equality and the Empowerment of Women (UN Women) and UN Police helped enhance social cohesion and policing in refugee areas.

41. In line with the “grand bargain” commitments, cash-based interventions were expanded to foster financial inclusion and strengthen resilience. In 2017, UNHCR delivered \$500 million in cash, reaching some 8 million persons of concern in over 94 operations. Although the volume decreased compared to 2016 (\$680 million), mainly due to a reduction in return grants in Afghanistan, a greater number of operations, including Greece, Rwanda and Somalia, introduced or expanded the use of cash. UNHCR doubled the number of cash experts in its operations and promoted common cash transfer mechanisms with partners to maximize efficiency. A review conducted by the Cash Learning Partnership showed that the common cash facility approach in Jordan (facilitated by the use of biometric iris recognition) was secure and efficient. The common cash facility is now considered best practice and its use was introduced in the addendum on cash assistance to the 2011 MOU between UNHCR and the World Food Programme (WFP). In line with its strategy to institutionalize cash-based interventions, UNHCR integrated cash programming in existing guidance, tools and processes, developed additional measures to support this growing form of assistance and updated financial procedures to ensure accountability.

D. Solutions

42. UNHCR’s strategic directions for 2017–2021 commit the organization to reinvigorating its focus on solutions, including through the rollout of the CRRF. To this end, UNHCR established a new Division of Resilience and Solutions, bringing together key technical units from the Division of International Protection and the Division of Programme Support and Management, to bolster the Office’s engagement in this critical area. In addition to supporting the implementation of the global compact on refugees, the Division will provide support to field operations in areas such as education, livelihoods, self-reliance and reintegration. It will seek greater collaboration with development partners to promote inclusion in national services and support for host communities.

43. In 2017, 667,400 refugees returned to their countries of origin (an increase from 552,200 in 2016), many with UNHCR’s support. The majority returned to Nigeria (282,800) (often under adverse circumstances in which the voluntariness and sustainability of returns could not be assured), followed by the Central African Republic (78,600).

UNHCR also facilitated returns to Afghanistan, Burundi, Côte d'Ivoire, Mali, Rwanda, Somalia, Sri Lanka and Sudan. Most returnees received assistance from UNHCR, including cash grants to support reintegration.

44. The application of the CRRF in the Somalia situation focused on attaining solutions, particularly supporting the conditions for voluntary and safe return, as well as strengthening protection space in the region. This included measures to strengthen security, build the capacity of the authorities and support the country's national development plan. With support from the United Nations Peacebuilding Fund, a Kenya-Somalia cross-border project is helping to strengthen the reintegration of returnees in Somalia. In October 2017, UNHCR put in place a post-return monitoring system to profile returnees.

45. In April 2018, UNHCR signed an MOU with the Bangladeshi Government on the voluntary return of stateless Rohingya refugees. It also called on Myanmar to take concrete measures to create the conditions conducive to return, consistent with the recommendations of the Advisory Commission on Rakhine State, including by addressing the root causes of displacement and providing pathways to citizenship. UNHCR is committed to supporting Myanmar with these efforts. In June 2018, UNHCR, UNDP and the Government of Myanmar signed a tripartite MOU, establishing a framework for cooperation aimed at creating the conditions conducive for voluntary, safe and sustainable returns and fostering livelihood opportunities for all communities living in Rakhine State.

46. In Afghanistan, over 60,000 refugee returns were reported, the majority from Pakistan. However, ongoing violence and insecurity in Afghanistan continued to trigger displacement and made sustainable returns challenging. Limited absorption capacity in return areas, due to the lack of livelihood opportunities, land and adequate shelter, also impacted returns. Afghanistan's Executive Committee on Displacement and Returnees continued bringing together key actors to address issues such as documentation and land for returnees. UNHCR and the World Bank Group signed a data-sharing agreement to support the reintegration of Afghan refugee returnees through strengthened data collection and analysis.

47. Although some spontaneous returns took place to the Syrian Arab Republic, the necessary safeguards and access required to facilitate voluntary repatriation are not yet in place. UNHCR continues to work on identifying and mitigating the obstacles to return, while supporting host countries in maintaining protection space. More resettlement places and complementary pathways for vulnerable Syrian refugees are also needed.

48. Several countries supported local integration for refugees, including by providing durable legal status and naturalization. In Guinea-Bissau, the Government granted citizenship to refugees who were living in a protracted situation. Zambia implemented its decision to provide long-term residency to former Rwandan refugees. In Chile, an initiative launched in 2017 grants access to nationality for people registered under non-citizen status and children born to foreign parents.

49. The resettlement system continued to face pressure, constraining UNHCR's ability to ensure protection for the most vulnerable refugees, including those with heightened protection risks and serious medical conditions. UNHCR estimated that nearly 1.2 million refugees were in need of resettlement at the end of 2017. However, during that year only 75,200 refugees were submitted for resettlement, less than half the number of the previous year (163,200), resulting in a 94 per cent gap between needs and places available. The reduction impacted UNHCR's ability to respond to resettlement priorities. With fewer places made available for urgent and emergency cases, UNHCR could only submit some 2,090 cases in these categories. UNHCR nevertheless ensured that more than 10 per cent of cases referred for resettlement in 2017 involved women and girls at risk. A total of 35 States accepted resettlement submissions from UNHCR in 2017, a figure at par with 2016 and significantly higher than in previous years.

50. Through the Emerging Resettlement Countries Joint Support Mechanism, UNHCR supported six countries with capacity development and technical advice to develop or expand their resettlement and humanitarian admission programmes. UNHCR also invested in the new Global Refugee Sponsorship Initiative, which promotes and supports community-based sponsorship. As foreseen by the global compact on refugees, a three-year

strategy will be developed to increase the pool of resettlement and complementary pathway places, including new resettlement countries, as well as to consolidate emerging programmes.

51. Complementary pathways for the admission of people in need of international protection facilitate access to protection and solutions, and alleviate pressure on host countries, particularly in large-scale and protracted situations. They also create opportunities for refugees to learn new skills, acquire an education and reunite with family members in third countries.

52. UNHCR supported the establishment and expansion of complementary pathways, including in Argentina, Brazil, Chile, Colombia, France, Japan and Peru. A partnership was established with the United World Colleges to expand secondary education for refugee students in third countries, and the organization Talent Beyond Boundaries was commissioned to create a database of refugee talent in Jordan and Lebanon to facilitate labour mobility to third countries. UNHCR and OECD initiated a mapping of non-humanitarian entry visas used by refugees in OECD countries to help develop guidance on complementary pathways. UNHCR also supported the adoption of the African Union Protocol on Free Movement of Persons, Right of Residence and Right of Establishment, which will facilitate access to other pathways for admission. Despite progress, refugees continue facing barriers and challenges in accessing complementary pathways, including being unable to obtain exit permits, entry visas and travel documents. Other challenges include a lack of adequate protection safeguards and strict eligibility criteria. UNHCR continues to support measures to overcome these obstacles.

V. Internal displacement

53. At the end of 2017, an estimated 40 million people were displaced inside their own country, down slightly from 40.3 million in 2016. Yet this slight decrease masks significant upheavals, including new large scale displacements and many people returning home in very difficult circumstances. The number of IDPs in the Democratic Republic of the Congo doubled in one year, from 2.2 million to 4.4 million. The largest number of IDPs were in Colombia (7.7 million), followed by the Syrian Arab Republic (6.2 million). There were also significant numbers in Iraq (2.6 million), Somalia (2.1 million), Yemen (2 million), Sudan (2 million) South Sudan, (1.9 million), Afghanistan (1.8 million) and Ukraine (1.8 million). In 2017, more than 470,000 individuals in Afghanistan were newly displaced, with 31 out of 34 provinces affected by conflict.

54. Some 4.2 million IDPs returned to their areas of origin in 2017, compared to 2.3 million in 2016, including in Iraq (1.5 million), the Syrian Arab Republic (597,200), Sudan (386,200) and Nigeria (381,800). However new displacement continued in parallel, reflecting ongoing insecurity. In the Syrian Arab Republic, despite the emergence of a few areas of relative stability, returnees faced protection-related challenges and hardships.

55. In line with UNHCR's strategic directions and commitment to more predictable and effective engagement across the spectrum of displacement, the Office worked to strengthen protection and bring about solutions for IDPs. In this context, UNHCR undertook an operational review of its engagement in IDP situations, which provided a roadmap of actions needed to strengthen the Office's response, from preparedness to solutions. It recommended that UNHCR engage earlier in new or evolving IDP situations; become a more reliable partner within the inter-agency response; create the evidence base to support analysis and protection-centred responses; and strengthen monitoring and support to operations.

56. UNHCR's response to internal displacement remained part of a broader inter-agency response. At the global level, UNHCR continued to lead the protection cluster, and co-lead the shelter cluster and the camp coordination and camp management cluster for conflict-related displacement. In the context of the twentieth anniversary of the Guiding Principles on Internal Displacement in 2018, UNHCR and partners reaffirmed their commitment to addressing internal displacement, including through the launch of a three-year multi-stakeholder Plan of Action to Advance Prevention, Protection and Solutions for IDPs.

Known as GP20, the plan of action was launched in April 2018 and endorsed by the Inter-Agency Standing Committee.

VI. Statelessness

57. Although statelessness is thought to affect some 10 million people worldwide, statistical information available to UNHCR confirms the presence of 3.9 million stateless individuals in 75 countries. Since the launch in 2014 of the #IBelong Campaign to end statelessness by 2024, progress has been made to prevent and reduce statelessness in a number of areas. During the reporting period, Chile acceded to the 1954 Convention on the Status of Stateless Persons and the 1961 Convention on the Reduction of Statelessness, and Burkina Faso and Luxembourg acceded to the latter, bringing the total number of States parties to 90 and 71 respectively. In October 2019, UNHCR will organize a high-level meeting at the annual session of the Executive Committee, which will allow States to announce pledges towards eradicating statelessness.

58. In 2017, some 56,500 people in 29 countries acquired nationality, with significant reductions in statelessness occurring in the Philippines, the Russian Federation, Sweden, Tajikistan and Thailand. Discrimination and the lack of safeguards in nationality laws are major causes of statelessness. Consequently, UNHCR worked closely with States on the reform of nationality laws. In Colombia, a new procedure was implemented by the civil registry to ensure no child born in the country to foreign parents with an irregular migratory status would be stateless. Brazil, Costa Rica and Ecuador adopted procedures to facilitate naturalization for stateless persons. Luxembourg amended its nationality law, strengthening safeguards against statelessness at birth and securing pathways for the acquisition of nationality by stateless persons.

59. Supporting States in addressing gender discrimination in nationality laws remained a priority for UNHCR. Madagascar and Sierra Leone amended their nationality laws to allow mothers to confer nationality to their children on an equal basis with fathers. Liberia, Somalia, Sudan and Togo were also in the process of reviewing their legislation in this regard. Notwithstanding these positive developments, by the end of 2017, 25 countries retained elements of gender discrimination in their nationality laws.

60. A lack of birth registration and official documentation also puts populations at risk of statelessness. The Lebanese authorities adopted new measures which simplified birth registration procedures for Syrians born in Lebanon between January 2011 and February 2018. It was estimated some 50,000 children will stand to benefit from this initiative. The Ethiopian Government took legislative steps to ensure access to birth registration and civil documentation for refugees. UNHCR welcomed the decisions by Brazil, Ecuador and Montenegro to establish statelessness determination procedures in their respective countries and to grant legal status to those identified.

61. New regional commitments were also secured. In October 2017, the Member States of the International Conference of the Great Lakes Region (ICGLR) signed a declaration on the eradication of statelessness and committed to a concrete plan of action. The League of Arab States adopted a declaration on belonging and legal identity, which calls for equal nationality rights for women and children. As a contribution to the development of the global refugee compact, States in Latin America and the Caribbean issued the “100 points of Brasilia”, containing good practices, including on preventing and addressing statelessness. Discussions continued on the draft African Union Protocol on the Specific Aspects of the Right to a Nationality and the Eradication of Statelessness.

VII. Contributions to UNHCR

62. UNHCR's annual budget for 2017 amounted to \$7.963 billion, comprising a revised budget of \$7.309 billion approved by the Executive Committee of the High Commissioner's Programme in October 2016, \$832.1 million for eight supplementary budgets to address unforeseen emergency needs and a budget reduction of \$179 million.

63. UNHCR was encouraged by the solid level of funding received in 2017, reaching over \$3.9 billion in fresh contributions. Total funds available to UNHCR amounted to \$4.510 billion, representing an overall increase of \$99.2 million, or 2 per cent, when compared to 2016. Despite the increase in funds available, the funding gap grew from \$3,098.9 million, or 41 per cent, in 2016 to \$3,452.8 million, or 43 per cent, in 2017. This meant that a higher percentage of the global needs of persons of concern were unfunded when compared to the previous year. Of the total funds available, unearmarked funding amounted \$588.7 million, a 4.6 per cent increase over the \$562.6 million received in 2016.

64. Since 2014, UNHCR has almost doubled its income from the private sector, which reached \$400 million in 2017, reflecting growing investments in private sector partnerships. Private sector funding accounted for a large source of unearmarked funding (\$207 million) and softly earmarked funding (\$69 million). Particularly noteworthy in 2017 was the increase in donations from private individuals, which reached \$276 million — an increase of \$53 million.

65. In 2017, \$1.5 billion was provided to over 1,000 NGO and other partners, accounting for around 37 per cent of UNHCR's expenses. Of this, \$699 million (\$670 million in 2016) was transferred to 826 local and national partners, including \$524 million (\$491 million in 2016) to 648 local or national NGOs. In line with the commitments made by UNHCR under the "grand bargain", this represented the highest level of funding ever provided to local and national partners.

VIII. Reform, accountability and oversight

66. Over the past year, UNHCR undertook a number of reforms to enable the Office to pursue its strategic directions for 2017–2021 in a more effective, efficient and accountable manner. These efforts included an independent review of the design, structure and processes of UNHCR's Headquarters, which made a compelling case for change aimed at ensuring that UNHCR remains dynamic and field-oriented. A Director of Change Management was appointed to oversee this process.

67. Reviews of UNHCR's human resources management, communications and private sector engagement were undertaken. On human resources, the review recommended transitioning this function towards a more forward-leaning, strategic one, working more closely with operations. Changes stemming from previous reviews included the creation of the Division of Resilience and Solutions, an Integrated Programme Management Service and a single Partnership Service, bringing together resources previously spread across various divisions.

68. On oversight, UNHCR's efforts focused on follow-up to the recommendations made by a review which took place during the previous year reporting period.⁶ Key changes were made to the structure, roles and responsibilities of the Inspector General's Office (IGO), including in relation to its interface with other oversight entities, both inside and outside UNHCR. This included the discontinuation of the Inspection Service and creation of a new Strategic Oversight Service, the assumption of responsibility for providing support to the Independent Audit and Oversight Committee, and strengthened interface with the internal audit function provided by the Office of Internal Oversight Services. As UNHCR's programmes, budgets and staffing have increased over the years, so have the number of misconduct-related complaints received by the IGO, mostly in relation to fraud with financial impact, RSD and resettlement, as well as allegations of sexual exploitation and abuse.⁷ To respond to this increase in complaints, additional resources were made available to the IGO, the Legal Affairs Service and other bodies to ensure all allegations are investigated and addressed in a timely and effective manner.

69. UNHCR stepped up its efforts to prevent and respond to sexual harassment, exploitation and abuse through awareness-raising, effective investigations, survivor and whistle-blower protection and robust actions against perpetrators. A Senior Coordinator

⁶ See [A/AC.96/1182](#), paras 2–20.

⁷ *Ibid.*, paras 26–45.

was appointed to lead and coordinate UNHCR's work on these matters, reporting to the Deputy High Commissioner and working closely with relevant entities at Headquarters. In May 2018, a new strategy and action plan was adopted to strengthen measures aimed at eradicating sexual harassment and sexual exploitation and abuse through a victim-centred approach, including by reinforcing internal systems.⁸ Other measures taken or initiated included the formation of an emergency task force, commissioning of a review of UNHCR's procedures and policies on sexual exploitation and abuse, establishment of a 24-hour hotline, strengthening of community-based feedback and complaints mechanisms, and improved guidance and training for UNHCR personnel and partners.

70. In order to combat fraud and corruption, UNHCR issued a new handbook for UNHCR personnel which focuses on prevention, detection and reporting. The objectives are to promote a culture of integrity and honesty; ensure consistent organizational behaviour, starting with senior management, and assign responsibility for developing stronger controls; raise awareness of the various types of fraudulent acts; and strengthen mitigating actions.

71. UNHCR enhanced its approach to risk management through a number of measures aimed at strengthening management systems and the integrity of the Office's programmes, and at addressing the root causes of corruption and fraud. Accordingly, UNHCR launched a new risk management 2.0 initiative designed to ensure that strategic planning and decision-making are consistently informed by operational and management risks, with the intent of proactively identifying and preventing potential fraud and corruption. Additional risk management capacity has been embedded in selected operations, beginning with Kenya and Uganda, to strengthen local management and identify areas where mitigation measures need to be strengthened. This enabled the proactive identification and treatment of risks, and the sharing of lessons learned across the organization.

72. UNHCR upgraded part of its Enterprise Resource Planning (ERP) system, leading to better accountability and greater transparency. This includes revised procedures and templates for UNHCR-funded partnership agreements which were introduced to simplify and streamline them for enhanced accountability. Furthermore, risk management was embedded in the framework for implementing with partners, along with due diligence vetting and reinforced risk-based monitoring and auditing.

73. UNHCR reinforced its evaluation function to ensure greater independence and effectiveness. During the reporting period, the Evaluation Service completed 8 evaluations and launched 15 new ones in a number of strategic priority areas, representing a significant increase over previous years.

IX. Conclusion

74. UNHCR's efforts during the year have increasingly aligned with the key elements of the CRRF, especially but not only in the countries and regions applying it. While it may take time to show impact, the practical experience gained thus far is already demonstrating that when applied with commitment and vigour, these elements can make a difference. The proposed global refugee compact will take this commitment to the next level, with its relevance and value lying in the fact that it draws directly on operational experience.

75. The success of the global refugee compact, which is non-binding in nature, will depend on its collective ownership by the international community and the willingness of States and relevant stakeholders to contribute to and support the implementation of its objectives. Global refugee forums, to be convened at ministerial-level every four years, beginning in 2019, together with the high-level officials' meetings at two-year intervals, will help ensure sustained momentum. Furthermore, the establishment of support platforms will help galvanize context-specific support for concerned host countries and countries of origin. Implementation of the global refugee compact in ways that foster coherence with other processes and actions related to people on the move will also be important.

⁸ Available from <http://www.unhcr.org/SEA-ActionPlan>.

76. The generosity and solidarity of host countries and the communities that welcome refugees across the globe must be matched by more timely and predictable support, in line with the spirit of burden- and responsibility- sharing. The proposed global refugee compact presents an historic opportunity and sets in motion an irreversible path to achieve this. It has the potential to mobilize support for a shared agenda, grounded in the fundamental principles of humanity and solidarity, which could bring real change to the lives of refugees and the countries and communities that receive them. It represents a concrete, workable instrument of multilateralism in action, rooted in practical engagement to advance refugee protection and solutions. To work, it requires resources, strong leadership and — above all — a firm commitment to the principles and actions that have been so carefully put forward by States and key partners over the past year.

Table 1

Refugees, asylum-seekers, IDPs, returnees (refugees and IDPs), statelessness persons and others of concern to UNHCR by country/territory of asylum, end 2017

All data are provisional

Country/territory of asylum ¹	REFUGEES					Returned refugees ⁵	IDPs protected/assisted by UNHCR, incl. people in IDP-like situations ⁶	Returned IDPs ⁷	Persons under UNHCR's statelessness mandate ⁸	Others of concern to UNHCR ⁹	Total population of concern

Notes

The data are generally provided by Governments, based on their own definitions and methods of data collection.

A dash ("-") indicates that the value is zero, not available or not applicable. All data are provisional and subject to change.

¹ Country or territory of asylum or residence.

² Persons recognized as refugees under the 1951 UN Convention/1967 Protocol, the 1969 OAU Convention, in accordance with the UNHCR Statute, persons granted a complementary form of protection and those granted temporary protection. In the absence of Government figures, UNHCR has estimated the refugee population in many industrialized countries based on 10 years of individual asylum-seeker recognition.

³ This category is descriptive in nature and includes groups of persons who are outside their country or territory of origin and who face protection risks similar to those of refugees, but for whom refugee status has, for practical or other reasons, not been ascertained.

⁴ Persons whose application for asylum or refugee status is pending at any stage in the asylum procedure.

Where cases have been reported with an average number of persons, the number of cases reported has been multiplied by this average. This calculation has only been done to total numbers of asylum-seekers by country of asylum.

⁵ Refugees who have returned to their place of origin during 2017. Source: country of origin and asylum.

⁶ Persons who are displaced within their country and to whom UNHCR extends protection and/or assistance. It also includes people in IDP-like situations. This category is descriptive in nature and includes groups of persons who are inside their country of nationality or habitual residence and who face protection risks similar to those of IDPs but who, for practical or other reasons, could not be reported as such.

⁷ IDPs of concern to UNHCR who have returned to their place of origin during 2017.

⁸ Refers to persons who are not considered as nationals by any State under the operation of its law. This category refers to persons who fall under the agency's statelessness mandate because they are stateless according to this international definition, but data from some countries may also include persons with undetermined nationality. See Annex Table 7 at <http://www.unhcr.org/statistics/17-WRD-table-7.xls> for detailed notes.

⁹ Refers to individuals who do not necessarily fall directly into any of the other groups but to whom UNHCR may extend its protection and/or assistance services. These activities might be based on humanitarian or other special grounds.

¹⁰ The statelessness figure refers to a census from 2011 and has been adjusted to reflect the number of persons with undetermined nationality who had their nationality confirmed in 2011-2017.

¹¹ According to the Government of Algeria, there are an estimated 165,000 Sahrawi refugees in the Tindouf camps.

¹² Australia's figures for asylum-seekers are based on the number of applications lodged for protection visas.

¹³ Refugee figure includes 932,204 stateless persons from Myanmar.

¹⁴ Refugee figure related to the end of 2016.

¹⁵ All figures related to the end of 2016.

¹⁶ The 300,000 Vietnamese refugees are well integrated and in practice receive protection from the Government of China.

¹⁷ The statelessness figure is based on a Government estimate of individuals who themselves or whose parents or grandparents migrated to Côte d'Ivoire before or just after independence and who did not establish their nationality at independence or before the nationality law changed in 1972. The estimate is derived in part from cases denied voter registration in 2010 because electoral authorities could not determine their nationality at the time. The estimation is adjusted to reflect the number of persons who acquired nationality through the special 'acquisition of nationality by declaration' procedure until end of 2016. The estimate does not include individuals of unknown parentage who were abandoned as children and who are not considered as nationals under Ivorian law.

¹⁸ UNHCR's assistance activities for IDPs in Cyprus ended in 1999. Visit the website of the Internal Displacement Monitoring Centre (IDMC) for further information.

¹⁹ UNHCR is currently working with the authorities and other actors to determine the size of the population that found an effective nationality solution under Law 169-14. Since the adoption of Law 169-14 in May 2014, important steps have been taken by the Dominican Republic to confirm Dominican nationality through the validation of birth certificates of individuals born in the country to two migrant parents. According to information released by the authorities, 20,872 individuals had been issued their Dominican civil documents by the end of 2017.

²⁰ Almost all people recorded as being stateless have permanent residence and enjoy more rights than foreseen in the 1954 Convention relating to the Status of Stateless Persons.

²¹ All figures related to the end of 2016. Stateless figure refers to individuals without a nationality who were born in the Dominican Republic prior to January 2010 and who were identified by UNHCR in Haiti since June 2015.

²² Pending a more accurate study into stateless in Iraq, the estimate of stateless persons in Iraq has been adjusted to reflect the reduction of statelessness in line with Law 26 of 2006, which allows stateless persons to apply for nationality in certain circumstances.

²³ Figures are UNHCR estimates.

²⁴ Includes 34,000 Iraqi refugees registered with UNHCR in Jordan. The Government estimated the number of Iraqis at 400,000 individuals at the end of March 2015. This includes refugees and other categories of Iraqis.

²⁵ With respect to persons under UNHCR's statelessness mandate, this figure includes persons of concern covered by two separate Latvian laws. 178 persons fall under the Republic of Latvia's Law on Stateless Persons on 17 February 2004. 233,393 of the persons fall under Latvia's 25 April 1995 Law on the Status of those Former USSR Citizens who are not Citizens of Latvia or Any Other State ("Non-citizens"). In the specific context of Latvia, the "Non-citizens" enjoy the right to reside in Latvia ex lege and a set of rights and obligations generally beyond the rights prescribed by the 1954 Convention relating to the Status of Stateless Persons, including protection from removal, and as such the "Non-citizens" may currently be considered persons to whom the Convention does not apply in accordance with Article 1.2(ii).

²⁶ Refugee figure related to the end of 2016.

²⁷ Updated figure is based on a registration and community legal assistance programme undertaken in West Malaysia by a local NGO with technical support from UNHCR, which began in 2014. During 2017, 906 persons of those registered acquired Malaysian nationality.

²⁸ The figure of persons of concern under the statelessness mandate relates to stateless persons in Rakhine state and persons of undetermined nationality residing in other states in Myanmar. The figure of stateless persons in Rakhine state has been estimated on the basis of the 2014 census report and 2017 General Administration Department (GAD) of Ministry of Home Affairs (MoHA) data. It does not include an estimated 125,575 stateless IDPs who are also of concern under the statelessness mandate because they are already included within the IDP figures. In Rakhine State, the total number of stateless persons were estimated to be approximately one million in 2014 according to the Government census report. Revisions have been made to take into account the number of stateless persons who fled to Bangladesh during 2017. The number of remaining stateless persons residing in Maungdaw area as of end of December 2017 is highly uncertain as no reliable comprehensive data is available and access has been severely constrained. Outside of Rakhine state, the figure of those with undetermined nationality (25,939) is based on government data released on 27 December 2016 indicating the number of persons who hold an Identity Card for National Verification, and whose citizenship has not yet been confirmed.

²⁹ The data was provided by Government on 14 September 2017.

³⁰ Various studies estimate that a large number of individuals lack citizenship certificates in Nepal. While these individuals are not all necessarily stateless, UNHCR has been working closely with the Government of Nepal and partners to address this situation.

³¹ The data was provided by Government on 26 September 2017.

³² By the end of 2017, a total of 6,072 persons out of the 8,745 persons of Indonesian descent registered by the Government of the Philippines between 2014-2016 were confirmed as Filipino, Indonesian or dual nationals.

³³ The statelessness figure refers to the census figure from 2010 adjusted to reflect the number of stateless persons who acquired nationality in 2011-2017.

³⁴ Refugee figure for Iraqis was a Government estimate. UNHCR has registered and is assisting 16,300 Iraqis at the end of 2017. Figure for stateless persons is an estimate.

³⁵ Refugee figure for Syrians in Turkey was a Government estimate.

³⁶ IDP figure in Ukraine includes 800,000 people who are in an IDP-like situation.

³⁷ The statelessness figure refers to stateless persons with permanent residence reported by the Government in 2010. The figure has been adjusted provided that citizenship of Uzbekistan was granted to 1,148 persons since December 2016. Information on other categories of stateless persons is not available.

³⁸ A study is being pursued to provide a revised estimate of statelessness figure.
