INTRODUCTION TO UNHCR

The Office of the United Nations High Commissioner for Refugees was established on December 14, 1950 by the United Nations General Assembly. The agency is mandated to lead and co-ordinate international action to protect refugees and resolve refugee problems worldwide. Its primary purpose is to safeguard the rights and well-being of refugees. It also has a mandate to help stateless people.

In more than five decades, the agency has helped tens of millions of people restart their lives. Today, a staff of some 6,600 people in more than 110 countries continues to help about 60 million persons. To help and protect some of the world’s most vulnerable people in so many places and types of environments, UNHCR must purchase goods and services worldwide. For further information on UNHCR, its mandate and operations please see [http://www.unhcr.org](http://www.unhcr.org).

BACKGROUND

Access to modern and reliable energy services at affordable prices remains essential for sustainable human development, economic growth, quality of life, and better delivery of education and health services. Inadequate energy access has hampered economic growth of communities seeking to move out of lower income or lower middle-income status. UNHCR’s [Global Strategy for Sustainable Energy (2019-2024)](http://www.unhcr.org) provides timely and much-needed guidance to UNHCR’s operations worldwide. This Strategy ultimately aims to ensure refugees and host communities meet their energy needs in a safe and sustainable manner. This is achieved by increasing the use of Renewable Energy (RE) sources, efficient technologies and by adopting energy-conserving practices, which improve the protection, security, and well-being of targeted beneficiaries.

The Global Strategy for Sustainable Energy calls for market-based energy interventions that are anchored in efforts to empower refugees to meet their energy needs, just like everyone else. Refugees and host communities shall be able to participate in their local energy market without distorting the market. Such interventions will include initiatives that enhance productivity and support livelihoods. UNHCR continues to receive pledges on clean energy access for refugees and host communities from donors, private sector, and impact investors. With this background, UNHCR Pakistan distributed energy appliances, namely, energy efficient cooking stoves and solar lanterns among Persons of Concern (PoCs) residing inside the RVs. Some solar school bags were also distributed among refugees and host communities as a pilot project. Distribution of these appliances will directly address Outcome-1, Outcome-2 and Outcome-3 of the [UNHCR Global Strategy for Sustainable Energy](http://www.unhcr.org). UNHCR is now conducting Post Distribution Monitoring (PDM) of the appliances being distributed and the distribution process itself. This PDM will be carried out by a qualified firm as per the following details.
