INTRODUCTION TO UNHCR

The Office of the United Nations High Commissioner for Refugees was established on December 14, 1950 by the United Nations General Assembly. The agency is mandated to lead and co-ordinate international action to protect refugees and resolve refugee problems worldwide. Its primary purpose is to safeguard the rights and well-being of refugees. It also has a mandate to help stateless people.

In more than five decades, the agency has helped tens of millions of people restart their lives. Today, a staff of some 6,600 people in more than 110 countries continues to help about 60 million persons. To help and protect some of the world’s most vulnerable people in so many places and types of environment, UNHCR must purchase goods and services worldwide. For further information on UNHCR, its mandate and operations please see http://www.unhcr.org.

<table>
<thead>
<tr>
<th>Technical evaluation criteria (see details breakdown of scoring in “ANNEX B: TECHNICAL OFFER FORM” attached)</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Expertise and experience in Hydroponics systems technology</td>
<td>40%</td>
</tr>
<tr>
<td>Staff capacity to implement hydroponics technology</td>

</tr>
<tr>
<td>Ability to create value chain and market linkage</td>
<td>10%</td>
</tr>
<tr>
<td>Work Plan</td>
<td>10%</td>
</tr>
<tr>
<td><strong>Total:</strong></td>
<td><strong>70%</strong></td>
</tr>
</tbody>
</table>

The cut-off point for submissions to be considered technically compliant will be **50% out of the 70%**.

**Clarifications of Proposals:**

To assist in the examination, evaluation and comparison of proposals UNHCR may at its discretion ask the Bidder for clarification about the content of the proposal. The request for clarification and the response shall be in writing and no change in price or substance of the proposal shall be sought, offered or accepted.

The **Financial offer** will use the following percentage distribution: 30% from the total score.

The financial component will be analyzed only for those suppliers that pass the technical evaluation.
The maximum number of points will be allotted to the lowest price offer that is opened and compared among those invited firms. All other price offers will receive points in inverse proportion to the lowest price; e.g., \[\text{RWF lowest} \times \frac{[\text{total Price Component}]}{[\text{RWF lowest}]} \times \frac{[\text{RWF other}]}{[\text{RWF lowest}]} = \text{points for other supplier's Price Component}\].

(Copies of the PDF format documents may, as an addition, be included in Excel or other formats etc.). The Technical and Financial offers shall be clearly separated.

2.7 BID ACCEPTANCE:

UNHCR reserves the right to accept the whole or part of your bid or allow split or partial awards on this project.

UNHCR may at its discretion increase or decrease the proposed content when awarding the contract and would not expect a significant variation of the rate submitted. Any such increase or decrease in the contract duration would be negotiated with the successful bidder as part of the finalization of the Purchase Orders for Services.
UNHCR may, at its discretion, extend the deadline for the submission of bids, by notifying all prospective suppliers in writing. The extension of the deadline may accompany a modification of the solicitation documents prepared by UNHCR at its own initiative or in response to a clarification requested by a prospective supplier.

INSTALLATION OF HYDROPONICS SYSTEM

CAMP LOCATIONS: Gihembe (Gicumbi District), Kiziba (Karongi District), Mahama Refugee Camps (Kirehe District) as well as Gashora Transit Center (Bugesera District)

1. Background

Hydroponics is known as innovative technology solution of growing plants without soil on small piece of land. In efforts to address the issue of limited access to arable land for refugees, UNHCR would like to pilot the hydroponics technology in the selected refugee camps namely; Gihembe, Kiziba, Mahama Refugee Camps and Gashora Transit Center.

The main purpose is to improve the livelihoods and food security of refugees in selected pilot camps through hydroponics innovation agriculture. Hydroponics technology will help refugee farmers to access alternative, sustainable and profitable farming, in the context of overall lack of arable land in Rwanda due to hilly topography and high population density. As this is a pilot innovation project, initially the target group is refugees and if successful, subject to funding availability, UNHCR plans to scale it up across the all camps and even urban areas targeting both refugees and their host community farmers.

2. UNHCR Responsibilities

1. Avail the land in and/or near the pilot refugee camps in collaboration with MINEMA camp management, for the installation of hydroponics systems
2. Support the service provider in selecting the project beneficiaries, farming groups or cooperatives.
3. Monitor the implementation progress and explore possibilities for further market linkage facilitation to the farmer groups/cooperatives.
4. Pay the service provider as per the contract terms.

3. Service Provider Responsibilities/Key Deliverables

1. Installation of hydroponics systems in Gihembe, Kiziba, and Mahama refugee camps as well as Gashora Transit Center.
2. Capacity building of involved refugee farmers on hydroponics technology, agribusiness/horticulture value chain and cooperative management
3. Coach/mentor and monitor the farmer at least up to the 1st crop production
4. Market linkage of farmers to businesses involved in agribusiness/horticulture value chain
4. Type and quantity of hydroponics systems needed

6. Delivery Mechanism

UNHCR will engage a specialized hydroponics company/service provider through a competitive bidding process. The main services required include; installing hydroponics systems in targeted pilot locations, capacity building of involved refugee farmers on hydroponics technology and agribusiness /horticulture value chain, as well as market linkage. The hydroponics service provider will work in close collaboration with the camp management, UNHCR field offices and refugee committee to identify the suitable land for hydroponics set-up and developing selection criteria for the project beneficiaries. Preference may be given to some lead farmers with some farming experiences, but to maximize benefit a
group/cooperative approach would be preferred. After hydroponics systems set-up, the service provider will coach and monitor the farmers at least up to the 1st production. UNHCR will also monitor the implementation progress and explore possibilities for further market linkage facilitation to the farmer group/cooperative.

7. Tentative Timeline
