

Tunisia

November 2025

7, 812 refugees and asylum-seekers* are registered with UNHCR, most from countries affected by armed conflict and widespread violence.

Among them are people with **critical protection needs**, including victims of torture, gender-based violence survivors, and unaccompanied children.

In response to the changing context, UNHCR has **adapted its operations** by implementing activities both directly and through partners.

KEY FIGURES

7,812*

forcibly displaced people registered in Tunisia as of 30 September 2025, including 5,446 asylum-seekers and 2,366 refugees.

94%*

of registered individuals originate from countries affected by armed conflict and widespread violence.

892

individuals supported with financial assistance in November 2025.

776

UNHCR document renewals in November 2025.

5

departures on resettlement in November 2025.

9

departures on complementary pathway in November 2025.

* These figures reflect the registered population as of 30 September 2025, based on UNHCR's most recent presence verification exercise. They will be updated following the next verification.

FUNDING (AS OF 30 NOVEMBER 2025)

USD \$17.3 million

requested for Tunisia in 2025.

Operational context

At the crossroads of Africa and Europe, Tunisia is exposed to complex movement patterns involving refugees and migrants along the central Mediterranean route. The country continues to host asylum-seekers and refugees from Sudan, Syria, Somalia, and various West, Central and East African countries, many of whom have experienced conflict, persecution, and other protection risks before arrival. Among them are particularly vulnerable individuals, including victims of torture, survivors of gender-based violence, individuals with serious medical or psychosocial needs, as well as unaccompanied children.

In recent years, the operational environment for asylum-seekers and refugees has significantly evolved. Access to protection and essential services has become increasingly limited, exacerbating the situation faced by forcibly displaced populations. UNHCR has adapted its response to the evolving context by maintaining life-saving assistance while reducing certain activities that can no longer be implemented at scale. Direct implementation has been pursued for some services, while others continue through national partners, namely the Tunisian Scouts, the Arab Institute of Human Rights (IADH), and the Tunisian Association for Management and Social Stability (TAMSS). This approach has ensured continued delivery of critical assistance for the most vulnerable registered asylum-seekers and refugees, including healthcare, legal services, case management, safe shelter, and multi-purpose cash support.

Operational response

PROTECTION

- UNHCR continued its efforts to renew cards for registered refugees and asylum-seekers with a total of 776 cards successfully renewed in November 2025. In addition, four newborns were registered, and their details were added to the registered parents' file.
- UNHCR conducted vulnerability assessments for 51 registered refugees and asylum-seekers to identify the most appropriate interventions and referrals to existing services and assistance.
- As part of the UNHCR and UNICEF collaboration on case management and mental health and psychosocial for children under UNHCR's mandate, five best interest assessment were initiated during the month.
- UNHCR and its partner provided legal assistance, advice, and consultations to 11 additional refugees and asylum-seekers.

HELPLINE

- In November 2025, UNHCR's helpline service recorded a total of 2,096 communications from 1,066 unique callers. Helpline assistants provided callers with information, counselling, and orientation to specialized services and assistance.

SAFE SHELTER

- In November 2025, UNHCR hosted a total of 327 refugees and asylum-seekers in UNHCR-run five safe shelters, where they benefited from basic services, including case management, counselling, mental health and psychosocial support, and food assistance.
- UNHCR offered protection initiatives and empowerment programs to people living in the safe shelters, providing access to a range of activities such as language courses, sports, movie screenings, and regular hygiene, health, and mental health awareness sessions.
- UNHCR continued to provide rental and utilities support to the Jdariya transitional shelter in the governorate of Medenine, which hosted up to 122 refugees and asylum-seekers in November 2025.

HEALTH

- UNHCR and its partner helped vulnerable refugees and asylum-seekers access to national health facilities: 57 in-person and remote medical counselling sessions provided, 175 individuals benefited from accompaniment to health facilities, and 173 consultations and admissions were covered.
- UNHCR delivered psychosocial counselling to six individuals.
- To support the national health system, UNHCR, in collaboration with the Ministry of Health and regional authorities, donated a phacoemulsification machine to the hospital of Ben Guerdane. This equipment will help strengthen the hospital's capacity to perform cataract surgeries and improve access to essential ophthalmological care for refugees and host communities.

CASH-BASED INTERVENTIONS

- With the endorsement of the Tunisian government, UNHCR continued to implement cash-based interventions, benefiting 892 individuals in November 2025. In total, 610 individuals received multipurpose cash support, 146 received cash-for-food assistance, and 136 unaccompanied children received food vouchers.

SELF-RELIANCE

- Since the beginning of the year, 64 individuals have successfully completed their vocational training across accredited fields (welding, building electricity, caregiver, software testing), while 146 others were undergoing training in November 2025.
- UNHCR and its self-reliance partner continued their efforts to strengthen the resilience of asylum-seekers and refugees. In November 2025, job placements for two individuals were secured and approved by the Tunisian authorities.

Financial information

UNHCR is grateful for the critical support provided by donors who have contributed to its operations in Tunisia.

European Union | Italy | United States of America | Netherlands | Private donors in the United Arab Emirates | Switzerland | Denmark | Monaco | Germany | United Kingdom of Great Britain and Northern Ireland
