INTRODUCTION

The information provided in this document was mostly provided by Governments and compiled and analyzed by UNHCR. This document revises and updates the document "Asylum Applications in Europe in 1999", issued on 2 February 2000. In particular, data for Greece and Italy (annual data only) have now been included, Table 1 and 2 have been extended to cover additional asylum countries and data for a number of countries were revised and/or completed. Nevertheless, the statistics provided here should still be considered provisional and are subject to change.

I. ANNUAL TRENDS

In the 32 European countries listed in Table 1, the number of asylum applications lodged increased with 19.1 per cent, from 384,200 in 1998 to 457,600 in 1999. In the 15 countries of the European Union, the number of asylum applicants increased with 18.6 per cent, from 309,000 in 1998 to 366,600 in 1999.

While Germany continued to receive the largest number of applicants in Europe during 1999, it received 3.4 per cent fewer applications in 1999 compared to 1998. As a result, its share in the total number of applications submitted in Europe fell from 25.7 per cent in 1998 to 20.8 per cent in 1999.

The United Kingdom, while remaining the second largest recipient of asylum-seekers in Europe, experienced a 53 per cent increase from 1998 to 1999. Its share in receiving asylum-seekers in Europe increased, therefore, from 15.6 to 20 per cent [Note that in Table 1 the figures for the United Kingdom have been adjusted by UNHCR to reflect the number of persons in order to increase the comparability within Europe at the aggregate level. In all subsequent tables showing monthly trends and detailed data by origin, no such correction has been made.]

Switzerland, experiencing an increase in asylum applications of 12 per cent, became the third largest asylum-seeker receiving country in Europe in 1999, accounting for some 10 per cent of all asylum-seeker arrivals in 1999. The Netherlands, which was the third largest receiving country in 1998, fell to the fourth position in 1999. The country experienced a 13 per cent decrease in annual applications, causing its share in Europe to fall from 12 per cent in 1998 to 9 per cent in 1999. The Netherlands and Sweden were the only two main asylum-seeker receiving countries in Europe experiencing a major decline in applications lodged in 1999.

Belgium, the sixth largest recipient country during 1998, became the fifth largest receiving country in Europe during 1999 due to an increase in applications of some 63 per cent. France, experiencing an increase of 38 per cent, fell nevertheless from the fifth to the sixth place in Europe in receiving new asylum applications. Austria remained the seventh largest receiving country in Europe, despite an increase in applications of some 46 per cent in 1999. Italy received some 12,150 asylum-seekers during 1999, occupying the eighth position in Europe (was 9th in 1998). In Hungary, the number of asylum applications rose

by 56 per cent in 1999 as a result of which the country rose from the eleventh to the ninth position in receiving asylum-seekers in Europe.

Among the smaller asylum-seeker receiving countries in Europe, an increase of more than 50 per cent in 1999 was experienced by Bulgaria (62 per cent), Cyprus (152 per cent), Czech Republic (77 per cent), Finland (145 per cent), Ireland (67 per cent), Liechtenstein (126 per cent), Luxembourg (70 per cent), Slovak Republic (157 per cent) and Slovenia (74 per cent).

Of the 32 countries listed in Table 1, 20 experienced an increase, whereas 11 countries recorded a decrease. The decline in applications in some of the major asylum countries during 1999 (Germany, the Netherlands and Sweden) coincided with a sharp increase in some of the smaller receiving countries. This increased inflow in some smaller European receiving countries was caused in large part by the Kosovo crisis (see below).

II. ASYLUM APPLICATIONS AND TOTAL POPULATION

The above section considered the absolute number of applications lodged in Europe. However, it may be useful to compare the number of asylum applications with the total national population (Table 2). In doing so, it should be stressed that the scope for comparing the two data sets is limited, as most asylum-seekers are not granted long-term residence status.

During 1999, Liechtenstein received the highest number of asylum-seekers per 1,000 inhabitants (16.3), followed by Luxembourg (6.8), Switzerland (6.5), Belgium (3.5), Austria and the Netherlands (each 2.5), Norway (2.3) and Ireland (2.1). Conversely, the Baltic States, Portugal, Poland and Romania were among the countries, which received the lowest number of asylum applicants per capita.

European Union (EU) member states which received less asylum applications per 1,000 inhabitants during 1999 than the EU-average (0.98) were Finland (0.60), France (0.52), Greece (0.15), Italy (0.21), Portugal (0.03) and Spain (0.21).

III. ORIGIN

During 1999, some 120,700 citizens from the Federal Republic of Yugoslavia, most of whom Kosovo Albanians, applied for asylum in the 25 European countries listed in Table 4, accounting for 28 per cent of all applications lodged (see Table 3). They constituted some 50 per cent or more of all asylum applicants in 1999 in Liechtenstein (55 per cent), Luxembourg (90 per cent) and Switzerland (64 per cent). Compared to 1998, however, the increase in applications from citizens of the Federal Republic of Yugoslavia in Europe was, however, modest (23 per cent).

The number of asylum applications lodged by citizens other than from the Federal Republic of Yugoslavia increased from 264,800 in 1998 to 309,500 in 1999 (+17 per cent). The second largest country of origin of asylum applicants in Europe during 1999 was Iraq (8 per cent), followed by Afghanistan (6 per cent), Turkey (5 per cent) and Somalia (3 per cent).

The largest ten nationalities accounted for some 62 per cent of all asylum applications lodged in Europe during 1999.

Nationalities, which registered a decline in asylum applications in Europe during 1999, included Iraq (-9 per cent), Turkey (-9 per cent), Romania (-2 per cent), Algeria (-2 per cent) and Bosnia and Herzegovina (-36 per cent). Major nationalities which demonstrated a marked increase in applications included Afghanistan (28 per cent), the Islamic Republic of Iran (47 per cent), Russian Federation (96 per cent), China (83 per cent), Armenia (61 per cent), Sierra Leone (81 per cent), Azerbaijan (97 per cent), Slovak Republic (200 per cent) and Angola (102 per cent) (see Table 3).

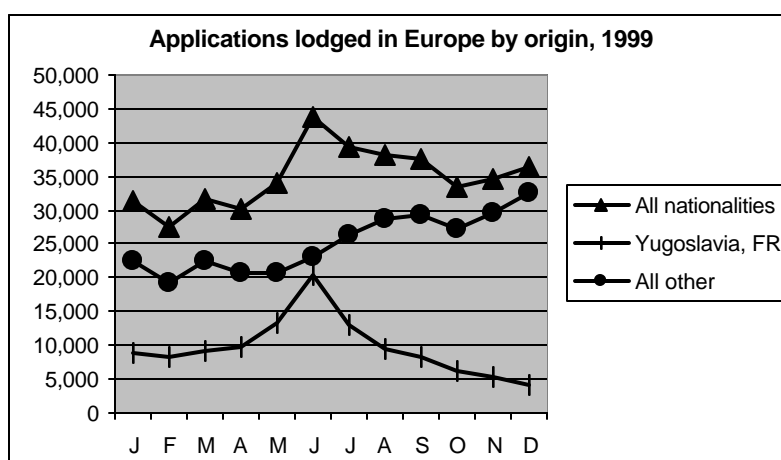

In 1999, some 17 per cent of the asylum-seekers who sought asylum in Europe originated from Africa, 39 per cent from Asia and 41 per cent from Europe. (Note that in this document, and in line with the official classification of the United Nations Secretariat, Turkey is included in Asia).

IV. QUARTERLY AND MONTHLY TRENDS

In the 24 European countries for which monthly asylum data were available (see Table 5 and following), the number of asylum applications during the fourth quarter of 1999 fell with almost 4 per cent compared to the third. In December 1999, the monthly number of asylum applications increased with some 6 per cent compared to November (see Table 6).

Significantly, the share of Germany in receiving applications in Europe has fallen from more than 25 per cent during the first three months of 1999 to some 19.5 per cent in December (Table 6b). Switzerland, which received more than 10 per cent of all asylum-seekers in Europe during the first six months of 1999, received only 4 per cent in December 1999. Conversely, the share of the United Kingdom in receiving new asylum applications in Europe has steadily increased from some 15 per cent during the first six months of 1999 to around 20 per cent in December.

The Kosovo crisis and the subsequent outflow of Kosovo Albanians have captured much attention in the European asylum countries during 1999. Indeed, in June 1999, the number of Kosovo Albanians who applied for asylum in Europe (20,500) almost equalled the number of applications lodged by all other nationalities (23,200) (see box). Since June 1999, however, the number of Kosovo Albanian applications has rapidly fallen to some 4,000 in December (see page 14). At the same time,

applications of other nationalities have increased steadily, from around 22,400 in January to 32,500 in December 1999.

While page 13 suggests that the total number of asylum applications lodged in the United Kingdom surpassed the number of applications submitted in Germany only in December 1999, this actually happened already in August, considering that the UK data reflect the number of "cases". On average, there are almost 1.3 persons per case in the United Kingdom. Page 14 through 34 provide monthly asylum applications in 24 European asylum countries for the 20 main nationalities.

Notes

All data are provisional, subject to change.

(1) Excluding "re-opened" applications.

(2) Excluding 892 applications for Temporary Protection submitted in April and 1,004 in May.

(3) Number persons estimated by UNHCR on the basis of cases (1.28 persons/case).
