Module 9 – Reproductive Health Postnatal Care and Family Planning

Using Information to
Protect Refugee Health

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

>1 What are the tools used for data collection?

- **Primary Tools**
 - **Postnatal Care Register**
 - **Weekly + Monthly RH Report**
- **Secondary Tools**
 - **Repeat Visits Book / Appointments Diary**
 - **Antenatal Card**

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

>2 Who is responsible for collecting the data?

- PNC staff in each camp should take responsibility for recording information
- RH Supervisor is responsible for compiling Weekly RH Report

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

Health Information System (HIS)
Slide 3

>3 What data should be collected and how?

- Monitor risk of postnatal complications during puerperium
- Recommended schedule = 3 visits in first 6 weeks
@ 24 hours, 7 days, 42 days
- Timing of visits very important

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

Postnatal Register

Serial No.	ANC No.	Name	Age	Status (Ref / Nat)	Address	DELIVERY DETAILS			
						Date of delivery	Mode of delivery	Delivery Compl.	Newborn Sex (M / F)

1st Postnatal Visit			2nd Postnatal Visit			3rd Postnatal Visit			Expected discharge date †	No. of visits made	Reason for exit **
Date	PNC compl.*	Comment	Date	PNC compl.*	Comment	Date	PNC compl.*	Comment

Slide 7

>3 What data should be collected and how?

- Method of contraception and information on number/dose given
- Uses generic categories of family planning methods
 - **Oral**
 - **Injectable**
 - **Implantable**
 - **IUCD**
 - **Condom**
 - **Sterilisation**
- Also classify type of contraception user: User / Repeat User / Discontinued

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

> Country Considerations

Table 1. Definitions of Types of Family Planning User

New user	A client who has never used the method before; or A user who has discontinued a method (see below), and since decided to re-start the same method
Repeat user	A client who has used the method on at least one previous visit, and has not missed a scheduled appointment by more than seven days*
Discontinued	A client who has not attended for a scheduled visit within seven days* of the appointment date

* The exact number of days should be adapted to the country context, and standardised among all health partners within written Reproductive Health policy guidelines

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

Family Planning Register

							REGISTRATION			
Serial No.	FP Code No.	Name	Age	Sex (M / F)	Status (Ref / Nat)	Address	Date of visit	Re-visit (Y / N)	Marital Status	No. of children

FAMILY PLANNING METHOD												
COCP Low Dose <i>Micro-gynon Nordette</i>	COCP High Dose <i>Lo-Femenal</i>	POP <i>Micro-val Micro-lut</i>	ECP <i>Postinor-2</i>	Injectable <i>Depo- Provera</i>	Implantable <i>Norplant</i>	IUCD	Condom		Sterilisation		Type of User*	Next appt. date
							Male	Female	Date of acceptance	Date of procedure

9.3 Postnatal Care

	Refugee		National	
	< 18	≥ 18	< 18	≥ 18
Attended for 3 postnatal visits within 6 weeks of delivery				

9.4 Family Planning

	Refugee						National
	New Users		Repeat Users		Discontinued		
	< 18	≥ 18	<18	≥ 18	<18	≥ 18	
COCP* - low dose (<i>Micro-gynon; Nardette</i>)							
COCP* - high dose (<i>Lo-femena</i>)							
POP** (<i>Micro-val; Micro-lut</i>)							
ECP*** (<i>Postinor-2</i>)							
Injectable (<i>Depo-Provera</i>)							
Implantable (<i>Norplant</i>)							
Intra-Uterine Device (IUD)							
Condom (Male)							
Condom (Female)							
Sterilisation (Male)							
Sterilisation (Female)							
Other							

9.5 Sexual and Gender Based Violence (SGBV)

	Refugee				National
	< 18		≥ 18		
	Male	Female	Male	Female	
Total no. of rape survivors seen in health centre					
No. female rape survivors given ECP*** within 120 hrs					
No. rape survivors given PEP**** within 72 hrs					
No. rape survivors given STI presumptive treatment < 2 wks					
No. cases of trauma in health post due to domestic violence					

* COCP = Combined Oral Contraceptive Pill; ** POP = Progestogen Only Pill; *** ECP = Emergency Contraceptive Pill

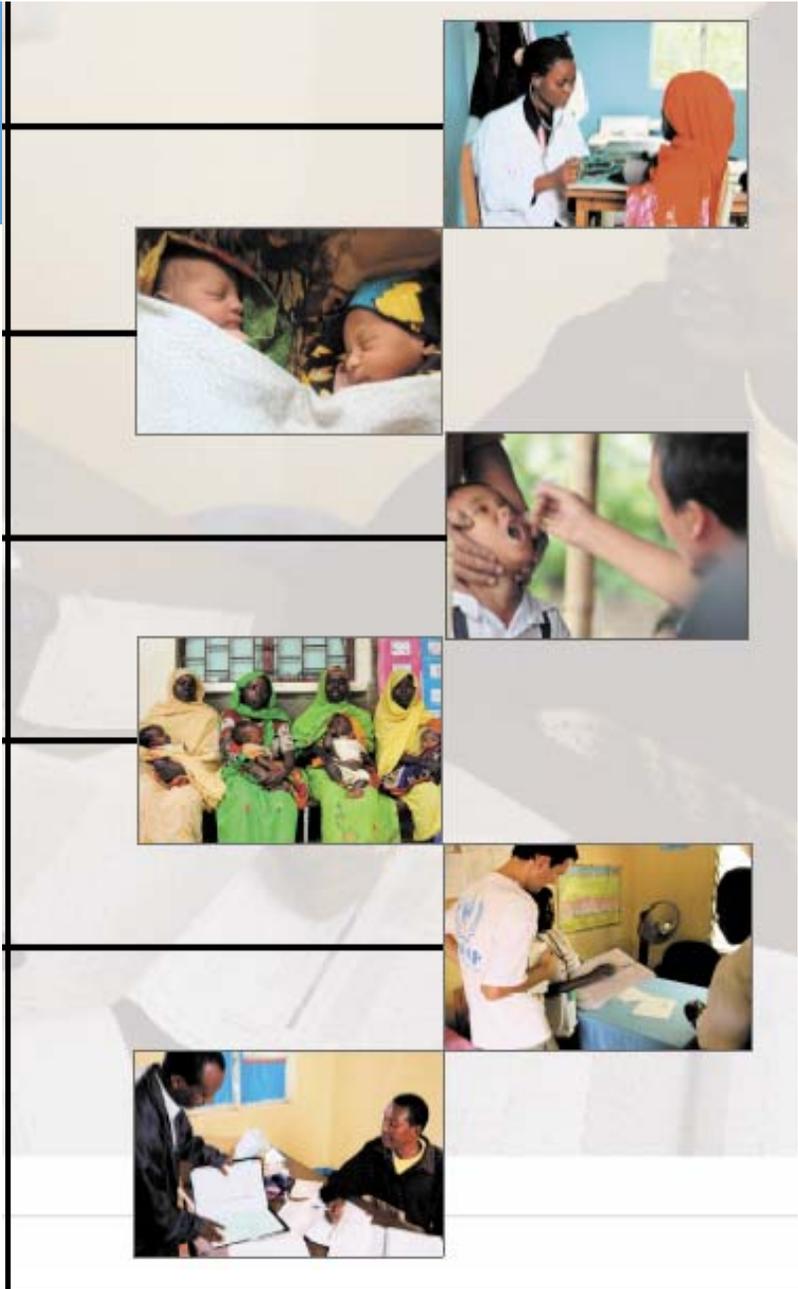

**** PEP = Post Exposure Prophylaxis

Modules 9 – Postnatal Care and Family Planning

Case Study 1(e) and Case Study 2

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

>4 How and when should the data be reported?

- Retrieve data from Registers
- Enter into Postnatal / Family Planning within Weekly RH Report
- Use photocopies / printouts if needed for individual facility-based reports

UNHCR

United Nations High Commissioner for Refugees
Haut Commissariat des Nations Unies pour les réfugiés

>5 How should the data be interpreted and used?

- Enter data into Monthly Excel Spreadsheet
- Understand how to interpret and use the indicators that are generated
