

Jamir has now made a group of friends, but he has fallen so far behind academically, that it is difficult to keep up with lessons.

?

Which strategies would you propose?

Other children tease him as he is the only child with a disability in the school, and he wants to drop out.

?

Which strategies would you propose?

Jamir can access the school buildings, but the toilets have narrow doorways, steps and no lockers.

?

Which strategies would you propose?

The road to school is uneven and unsafe, and the school is too far for Jamir to push his wheelchair up to the school.

?

Which strategies would you propose?

Jamir is always at home, as he can only walk short distances using his crutches.
