Technical Specifications of Bags for Clothing Kits

GENERAL DESCRIPTION

Bag with handles: Rectangular cuboid-shaped design with a reinforced structure, suitable for carrying clothing items (kits). The bag is handheld, odor-free and environmentally sustainable. Constructed with durable, well-stitched seams, it is capable of carrying a minimum load of 10 kg.

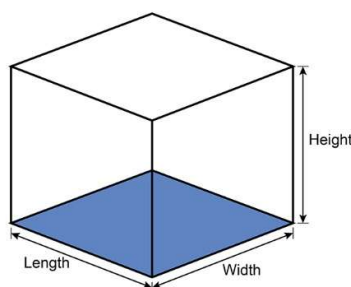

Quantity: 104,000 bags.

Dimensions:

- Length: 40 cm
- Width: 35 cm
- Height: 40 cm

The accepted tolerance for the above-mentioned dimensions is (± 0.5 cm)

** Measuring method - external dimensions when laid flat.*

Weight capacity of the bag: minimum 10 Kg.

Exterior color of the bag: solid black color.

Material (fabric): Bag is made of high-quality woven synthetic polypropylene fabric, 200 grams/sqm \pm 10 grams tolerance), strong and tear-resistant.

Bag fabric stitching. All seams of the bag shall be stitched using high-strength, industrial-grade polyester thread suitable for heavy-duty use. Stitching must be even, consistent, and free from loose threads, skipped stitches, or visible defects. All edges shall be securely finished from the inside of the bag with a double-fold hem to prevent fraying. Stress points (including handles and load-bearing seams) must be reinforced with minimum double stitching (or bar-tacking where applicable) to ensure durability under full load. The overall workmanship shall ensure a clean, uniform appearance and long service life.

Handles: Made of 100% polyester webbing sized at 3.5-4 cm wide. Two (2) long handles, each measuring 200 cm (\pm 5 cm tolerance) in total length, securely stitched with two (2) rows of seams around the inner

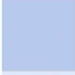

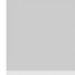

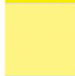

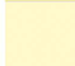

circumference of the bag. The free (loose) portion of each handle measures approximately 70 cm (\pm 2 cm tolerance).

Color of the handles: The handles shall come in a variety of solid colors, including blue, grey, white, red, and green. The specific handle color is determined based on the contents of the bag and can be chosen upon request at the time of requisition.

Estimated number of bags with the handles broken down by the handle color:

- Kit# 1: (32,683 pcs.) Bags with blue handle (Main Blue 4)
- Kit# 2: (15,600 pcs.) Bags with grey handle (Main Grey 4)
- Kit# 3: (23,752 pcs.) Bags with white handle (Main White 0)
- Kit# 4: (22,965 pcs.) Bags with red handle (Main Red 4)
- Kit# 5: (9,000 pcs.) Bags with green handle (Main Green 4)

Zipper: High-quality molded plastic jacket zipper, lightweight and flexible, with matching teeth and tape in the same color as the bag (i.e. black color). The zipper shall be size 8 mm (± 2 mm tolerance), ensuring smooth operation, ease of use, and long-lasting durability.

Label 1. Country of Origin (Internal Label):

Each fabric bag shall include an internal fabric label indicating the country of origin as “**MADE IN SYRIA / صُنِعَ فِي سوريَا**.” The label shall be made of white polyester taffeta, measuring 4 × 2 cm (± 0.5 cm), with black thermal transfer printing for clear and durable text. It shall have heat-cut edges to prevent fraying and be securely stitched into the upper inner seam on one long side of the bag. Only one label per bag is required. The label must remain legible and firmly attached after normal washing and wear. Its purpose is to identify the country of manufacture in compliance with product marking and origin requirements.

Label 2. Logos (External Marking):

The UNIQLO and UNHCR logos shall be printed on the outer surfaces of the bag using the offset printing technique, ensuring high-quality, durable, and non-fading results. Both logos shall appear on each of the two long sides of the bag, positioned side by side and aligned horizontally.

- **UNIQLO logo:** Printed in red, positioned on the left side; estimated size 12 × 12 cm (± 1 cm).
- **UNHCR logo:** Printed in blue, positioned on the right side; estimated size 12 × 12 cm (± 1 cm).

The two logos shall be of equal size, placed next to each other, and centered horizontally on the long sides of the bag. Both logos must remain clearly visible, legible, and colorfast under normal handling and use. The logos (external) and the country-of-origin label (internal) shall be placed on different sides of the bag to maintain clarity and avoid overlap.

Inner Packaging Specification.

Each individual bag shall be packaged in a transparent recycled polyethylene (rPE) bag prior to placement in the carton, providing protection and cleanliness. Each inner packaging (i.e. the polyethylene bag) containing the clothing bag shall be sealed using either adhesive tape or a heat-sealing method.

Outer Packaging Specification

Bags of equal quantity shall be packed in strong, export-quality double-wall (5-ply) carton boxes, arranged in flat bundles.

Each carton shall be labeled with item description, color, quantity, and UNHCR Purchase Order reference number, as per the sample provided. The carton label shall be in portrait orientation, measuring approximately 20 × 15 cm (± 1 cm). Printing shall be performed on two opposite sides of the carton using

flexographic or offset printing, depending on the carton surface, to ensure clear, durable, waterproof, non-fading, and abrasion-resistant markings.

Each carton shall be sealed with high-strength adhesive tape in a complete cross pattern, ensuring full closure and structural integrity during storage and transportation.

Carton dimensions shall be approximately 50 × 40 × 20 cm, confirmed to allow optimal fitting of the folded bags with minimal loose or empty space. Each carton shall contain approximately 30–40 bags, and the gross weight of each sealed carton shall not exceed 15 kg.
