The findings of the monitoring should not be generalized to all persons crossing checkpoints in the East of Ukraine.

- Marinka EECP was closed for five days due to the shooting on April 5. Red alert mode was imposed, all civilians were evacuated. One SBGS serviceman was wounded. Hnutove EECP was closed due to the reconstruction from April 5 to 8. As the two EECPs did not operate, lines at Maiorske and Novotroitske had increased.
- On April 23 during the road repair works an unexploded mine was found near PUI tent at Maiorske EECP. The EECP continued its operation, the mine was isolated and then removed from the EECP.
- Due to the temperature increase and stuffiness under the sheds, people at Stanytsia Luhanska EECP were fainting (up to 20 persons per week).
- By the end of the month monitors reported about the lack of potable water at Stanytsia Luhanska as the water tanks were not installed yet. Monitors at Marinka EECP noted the lack of technical water: sometimes the water pump cannot cope with the high demand.
- SBGS at Stanytsia Luhanska continues to restrict the movement of people who provide transportation between the GCA and NGCA checkpoints for persons with impaired mobility for a fee. Due to the restrictions these people have to walk a great distance themselves.

77% of all respondents were never displaced due to the conflict
6% of respondents mentioned incidents of not being able to cross the contact line in the six months prior to the time of their survey
5% of all respondents were accompanying minors across the contact line

- 69% of all respondents were not aware of any mechanism for raising complaints regarding the functioning of governmental entities and/or NGOs.

### ABUSE OF POWER

Although respondents did not report any cases of abuse of power, several cases of disrespectful/discriminatory behaviour by SBGS servicemen and policemen were witnessed by the end of the month at Marinka EECP.

For instance, on April 24 a policeman was collecting passports without people’s consent, entering the data to the tablet. He explained that the procedure was necessary to check with the “Mirotvoret” database.

### NUMBER OF CROSSINGS

The number of crossings decreased by **16 thousand** in comparison to the previous month. The number of crossing in April 2019 is even to the previous year (April 2018).
